

Web & Mobile applications at rocket speed

Portfolio - Selected Projects

Wise!

Wise choice!

We create applications that will make your company shine. Whether it is Apple iOS, Google Android, Web or Unity 3D, no technical challenge can stand in our way to success.

● You can feel safe

Our Founder and CEO of Softnauts Software House and co-founder of Codete Software House supervises the delivery of mobile and web solutions for the most demanding markets all over the world.

Konrad Przyłudzki

CEO, Founder

<https://pl.linkedin.com/in/przyludzki>

You are in the best possible place in the World.
Thank you for choosing Softnauts - a Team which can help your project stand out in the crowded marketplace.

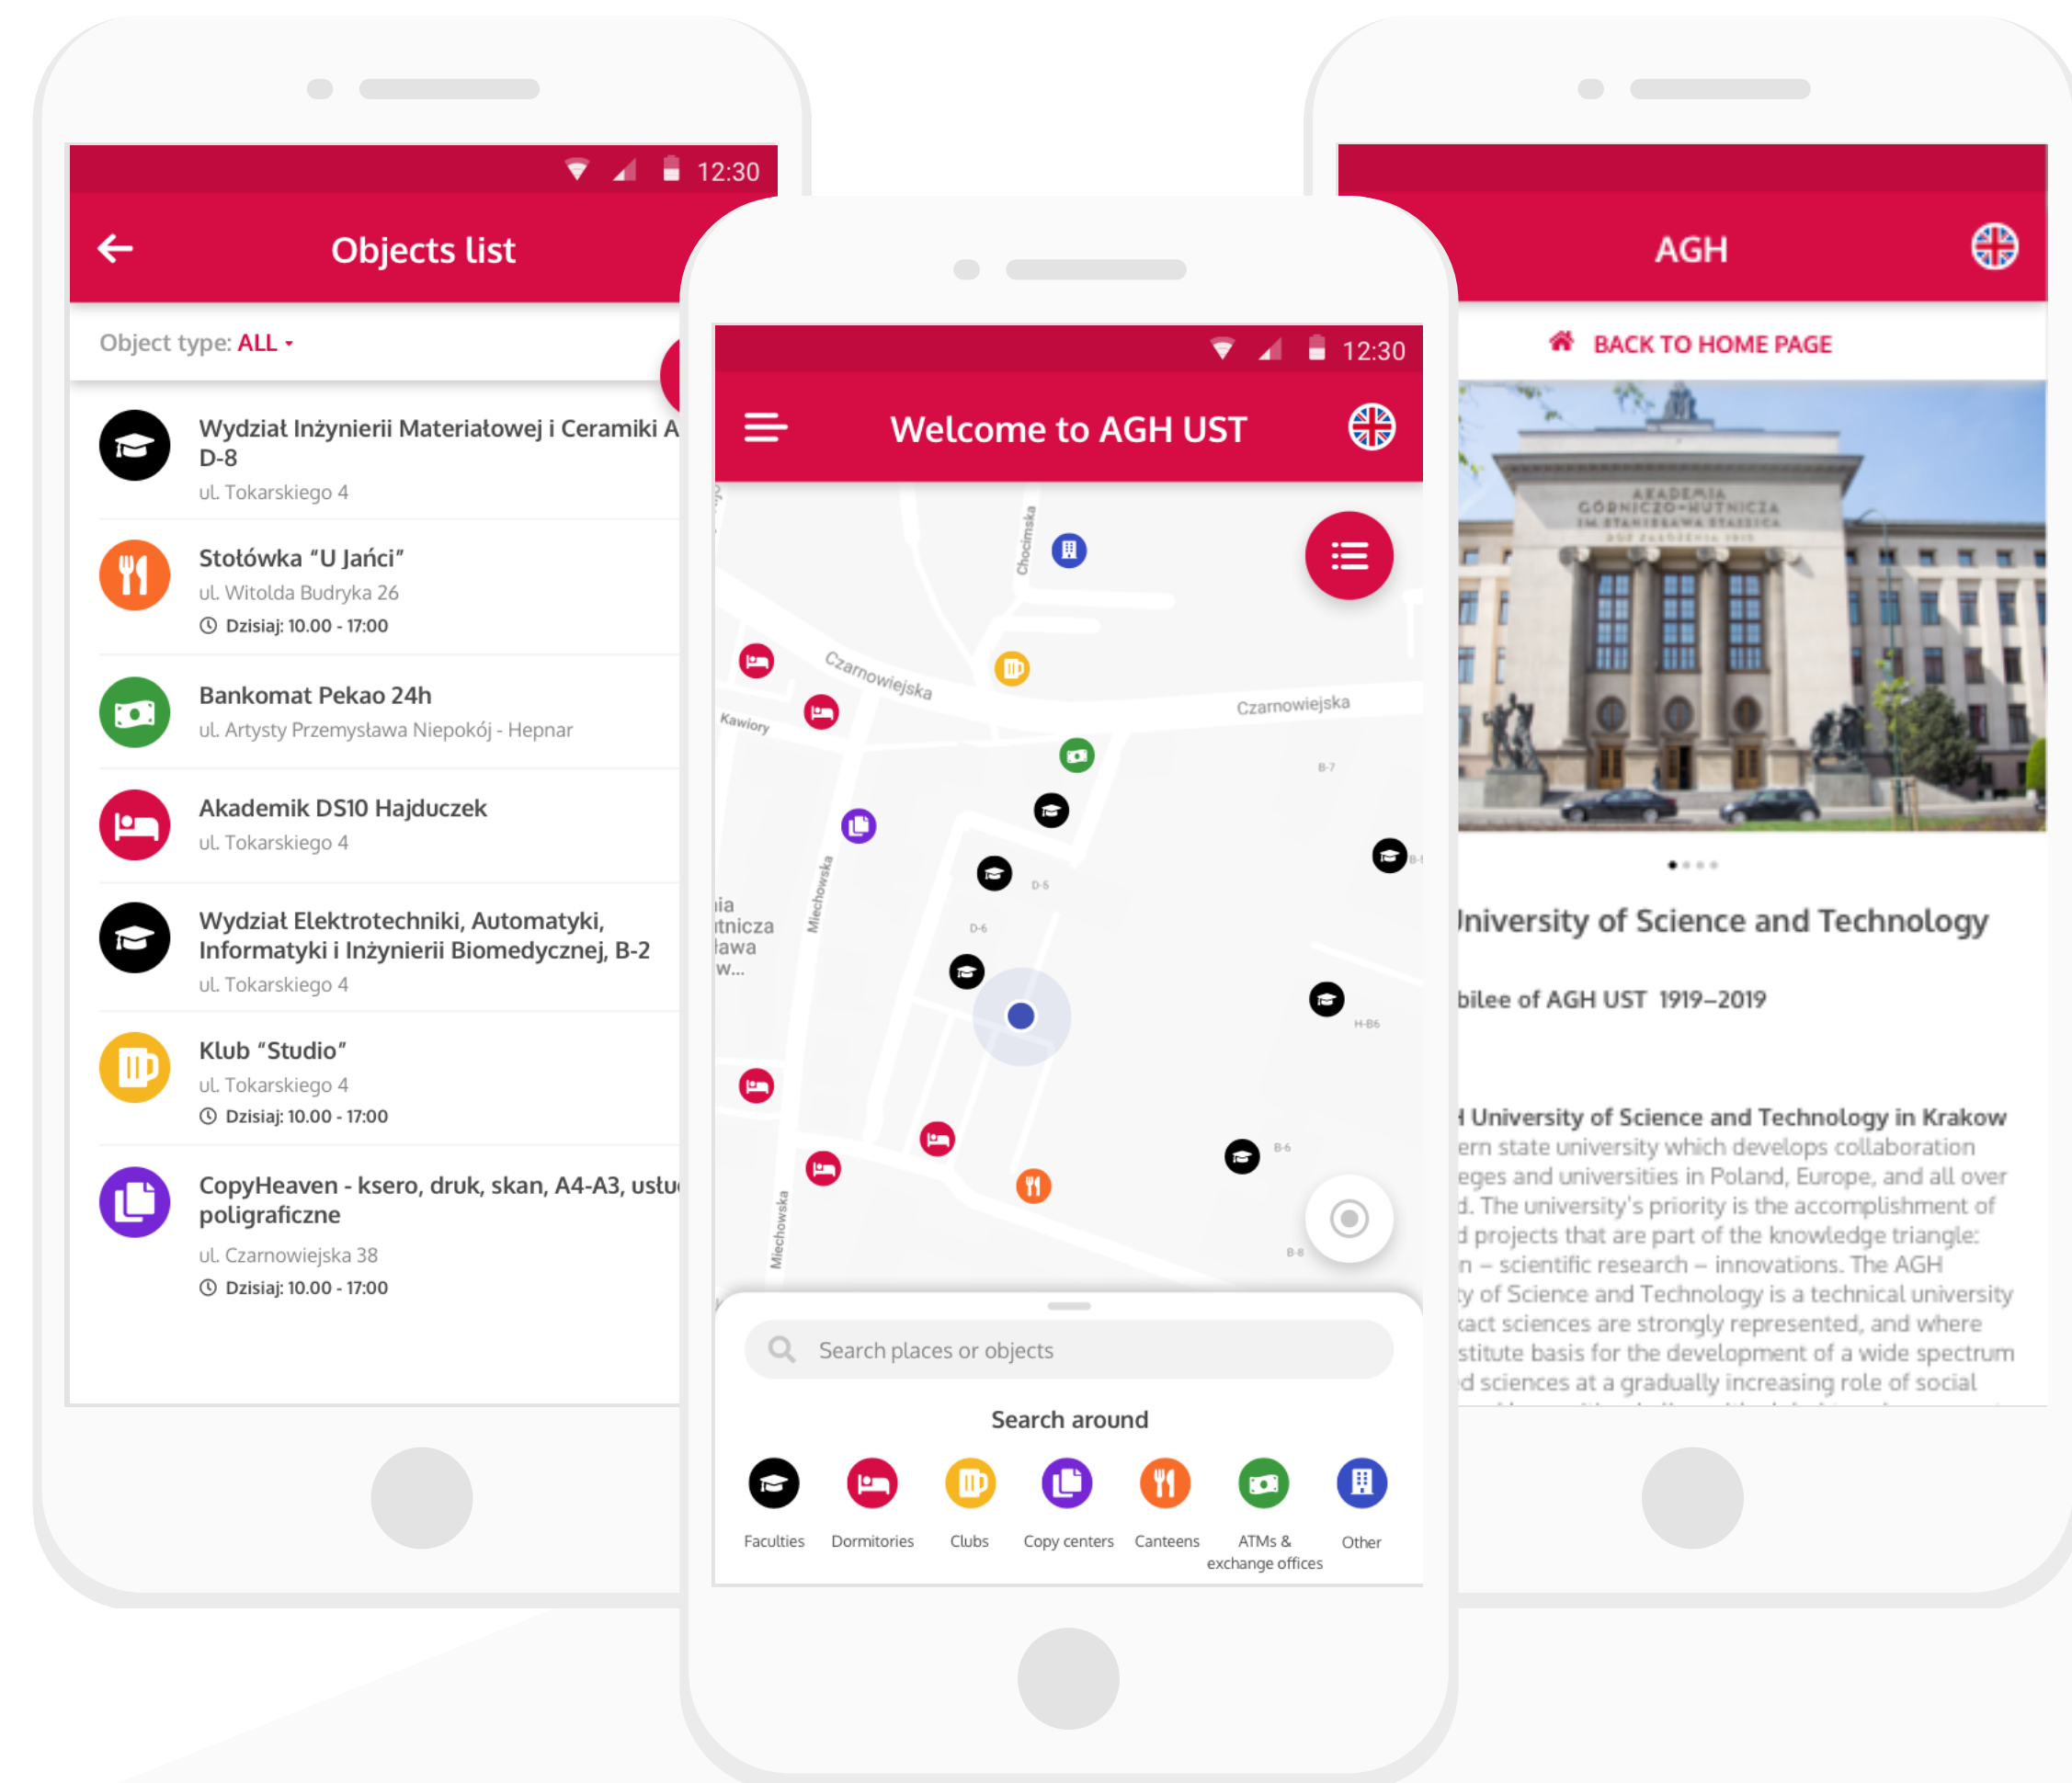

A handwritten signature in dark gray ink, reading "Konrad Przyłudzki". The signature is written in a cursive style.

Welcome to AGH UST!

Application for AGH UST students

'Welcome to AGH UST' app is addressed to all international students who arrive at the campus for the first time and candidates willing to study at the AGH University of Science and Technology.

Its main goal is to help students to move around the AGH UST Campus and provide them with indispensable information including opening hours of Deans' offices, locations of AGH UST premises (faculties, dormitories, sport facilities, student clubs, copy centres, canteens and many more) with the function of navigation, events and news connected with student life as well as information about Krakow and its top attractions.

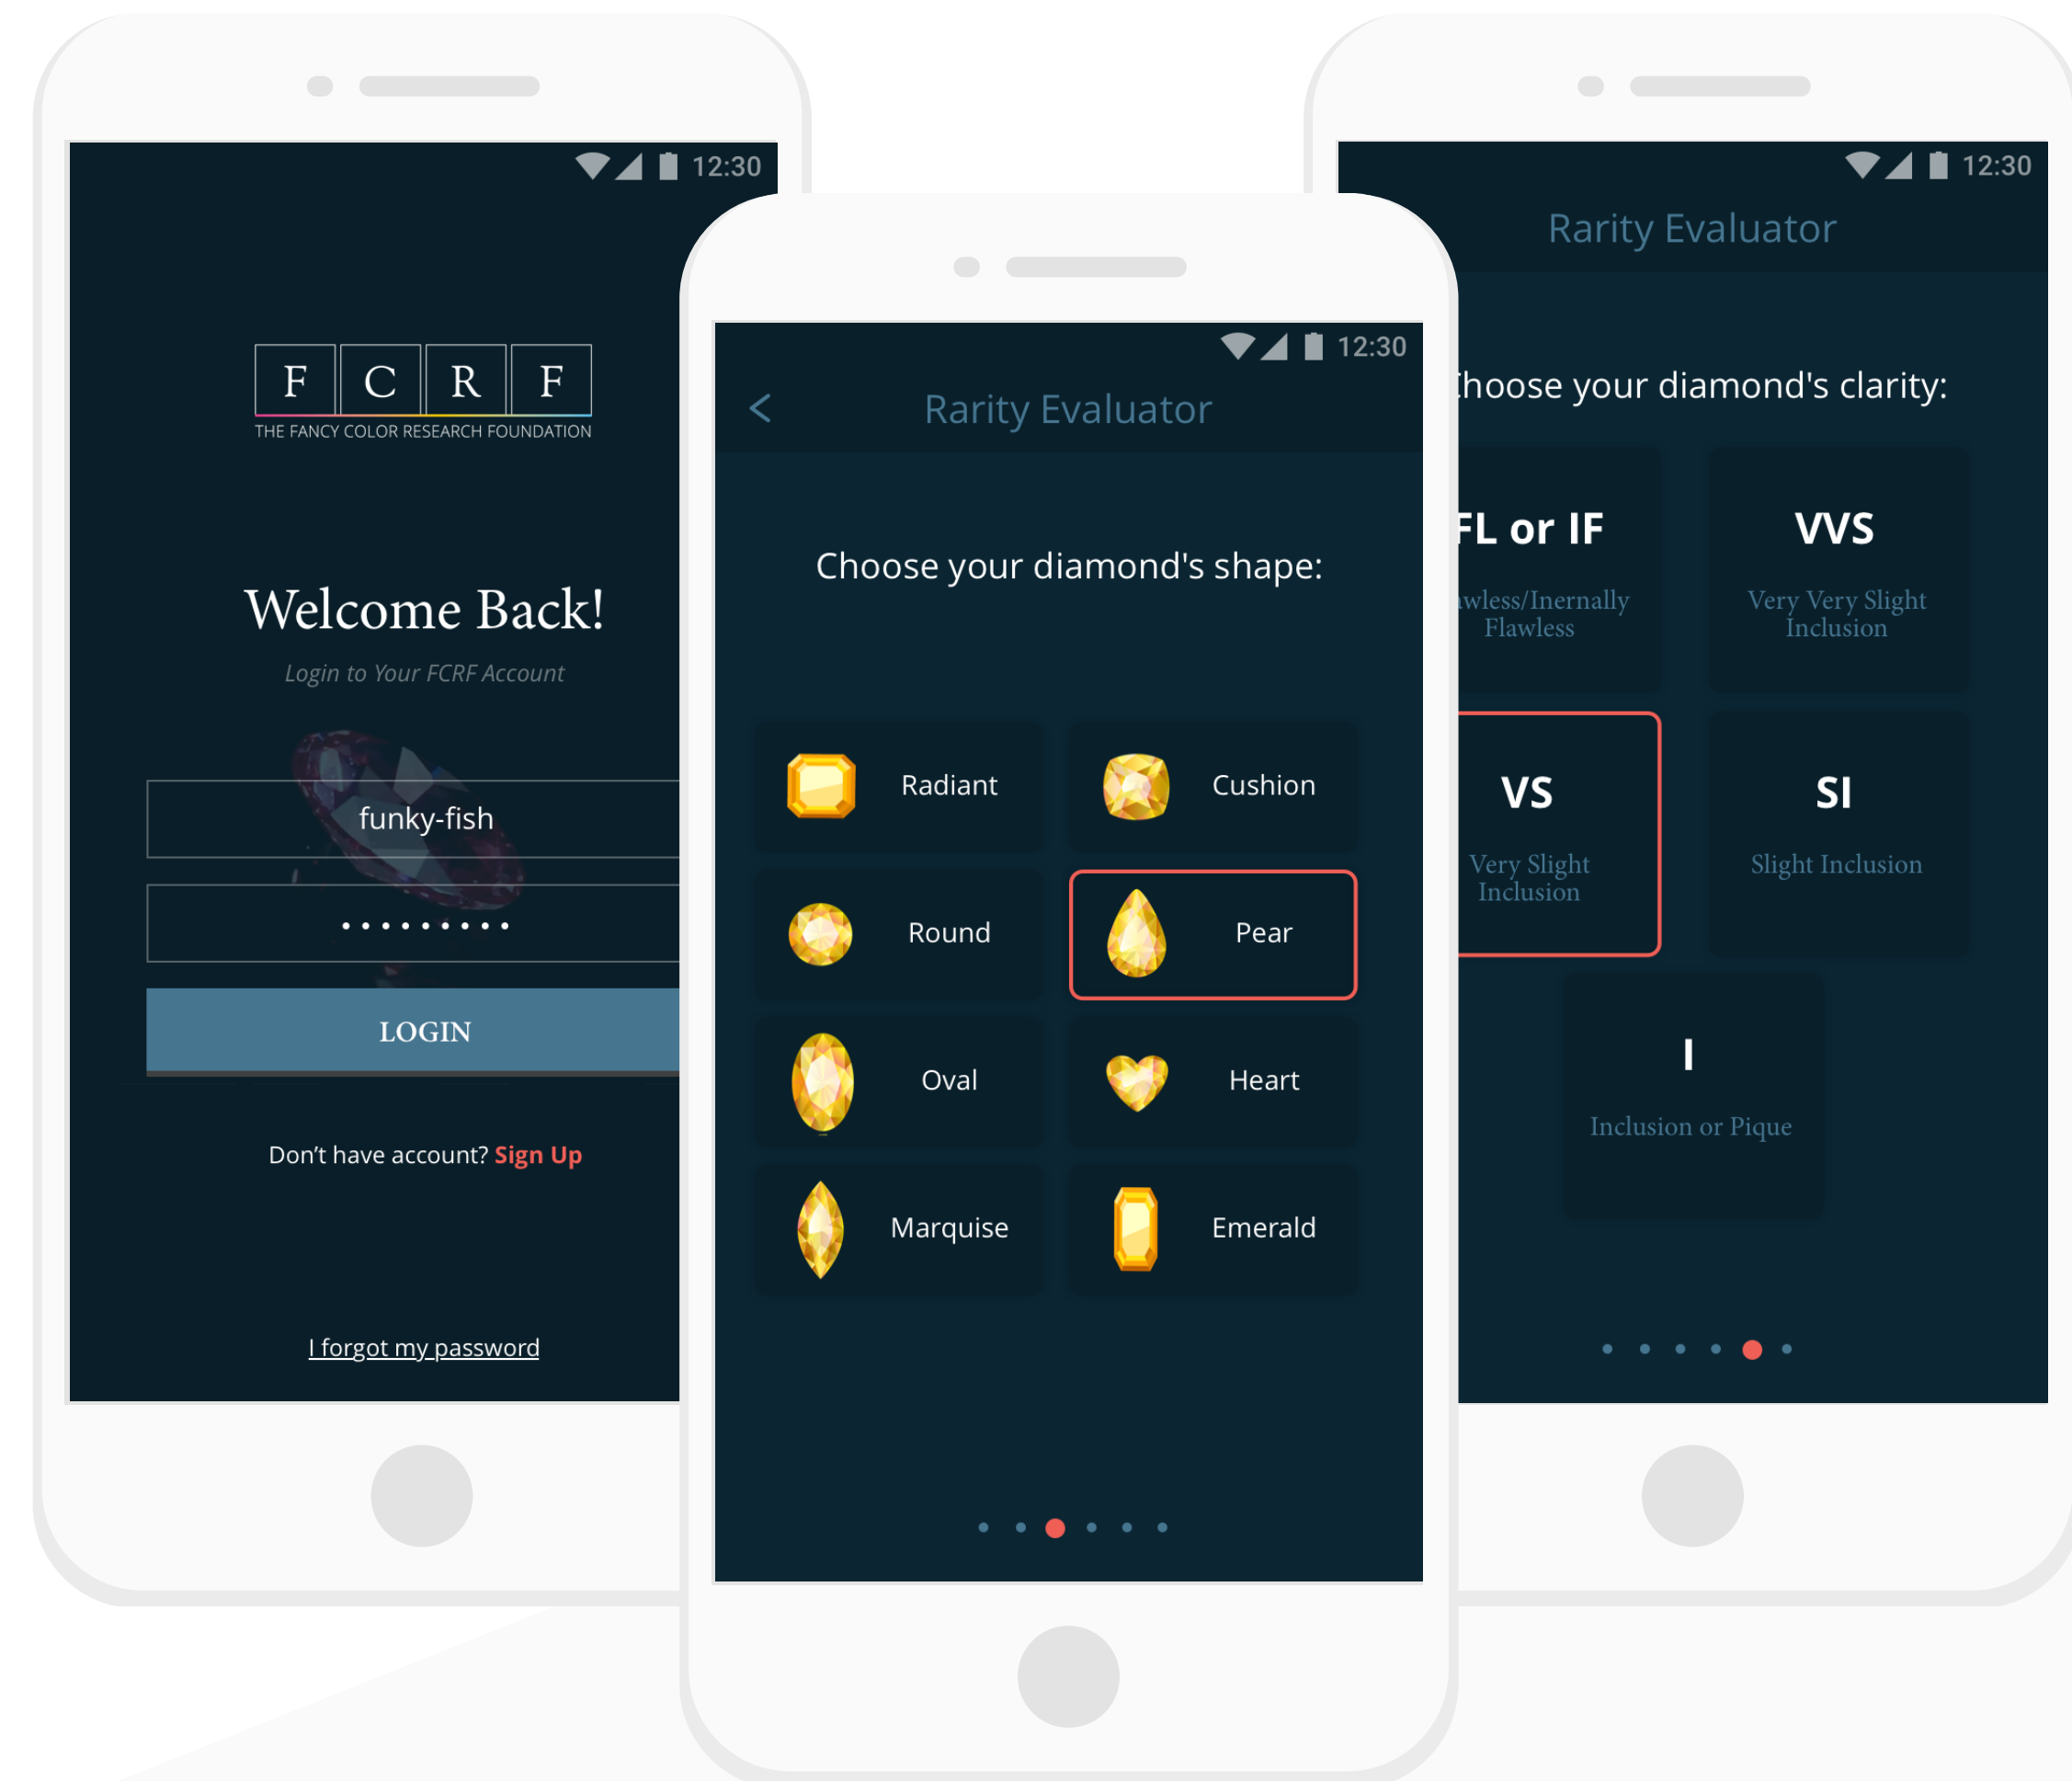

FCRF

Truly shiny application for diamonds cost estimation

The Fancy Color Diamond Index is a first-of-its-kind tracker of changes in the market prices (per carat) of yellow, pink and blue fancy color diamonds, the three most commonly traded FCD categories.

It is a composite representation of changes in price points gathered since 2005, based on a statistically significant sample size (tens of thousands of diamonds).

The index offers insight into variations in the appreciation of diamonds of different colors and sizes.

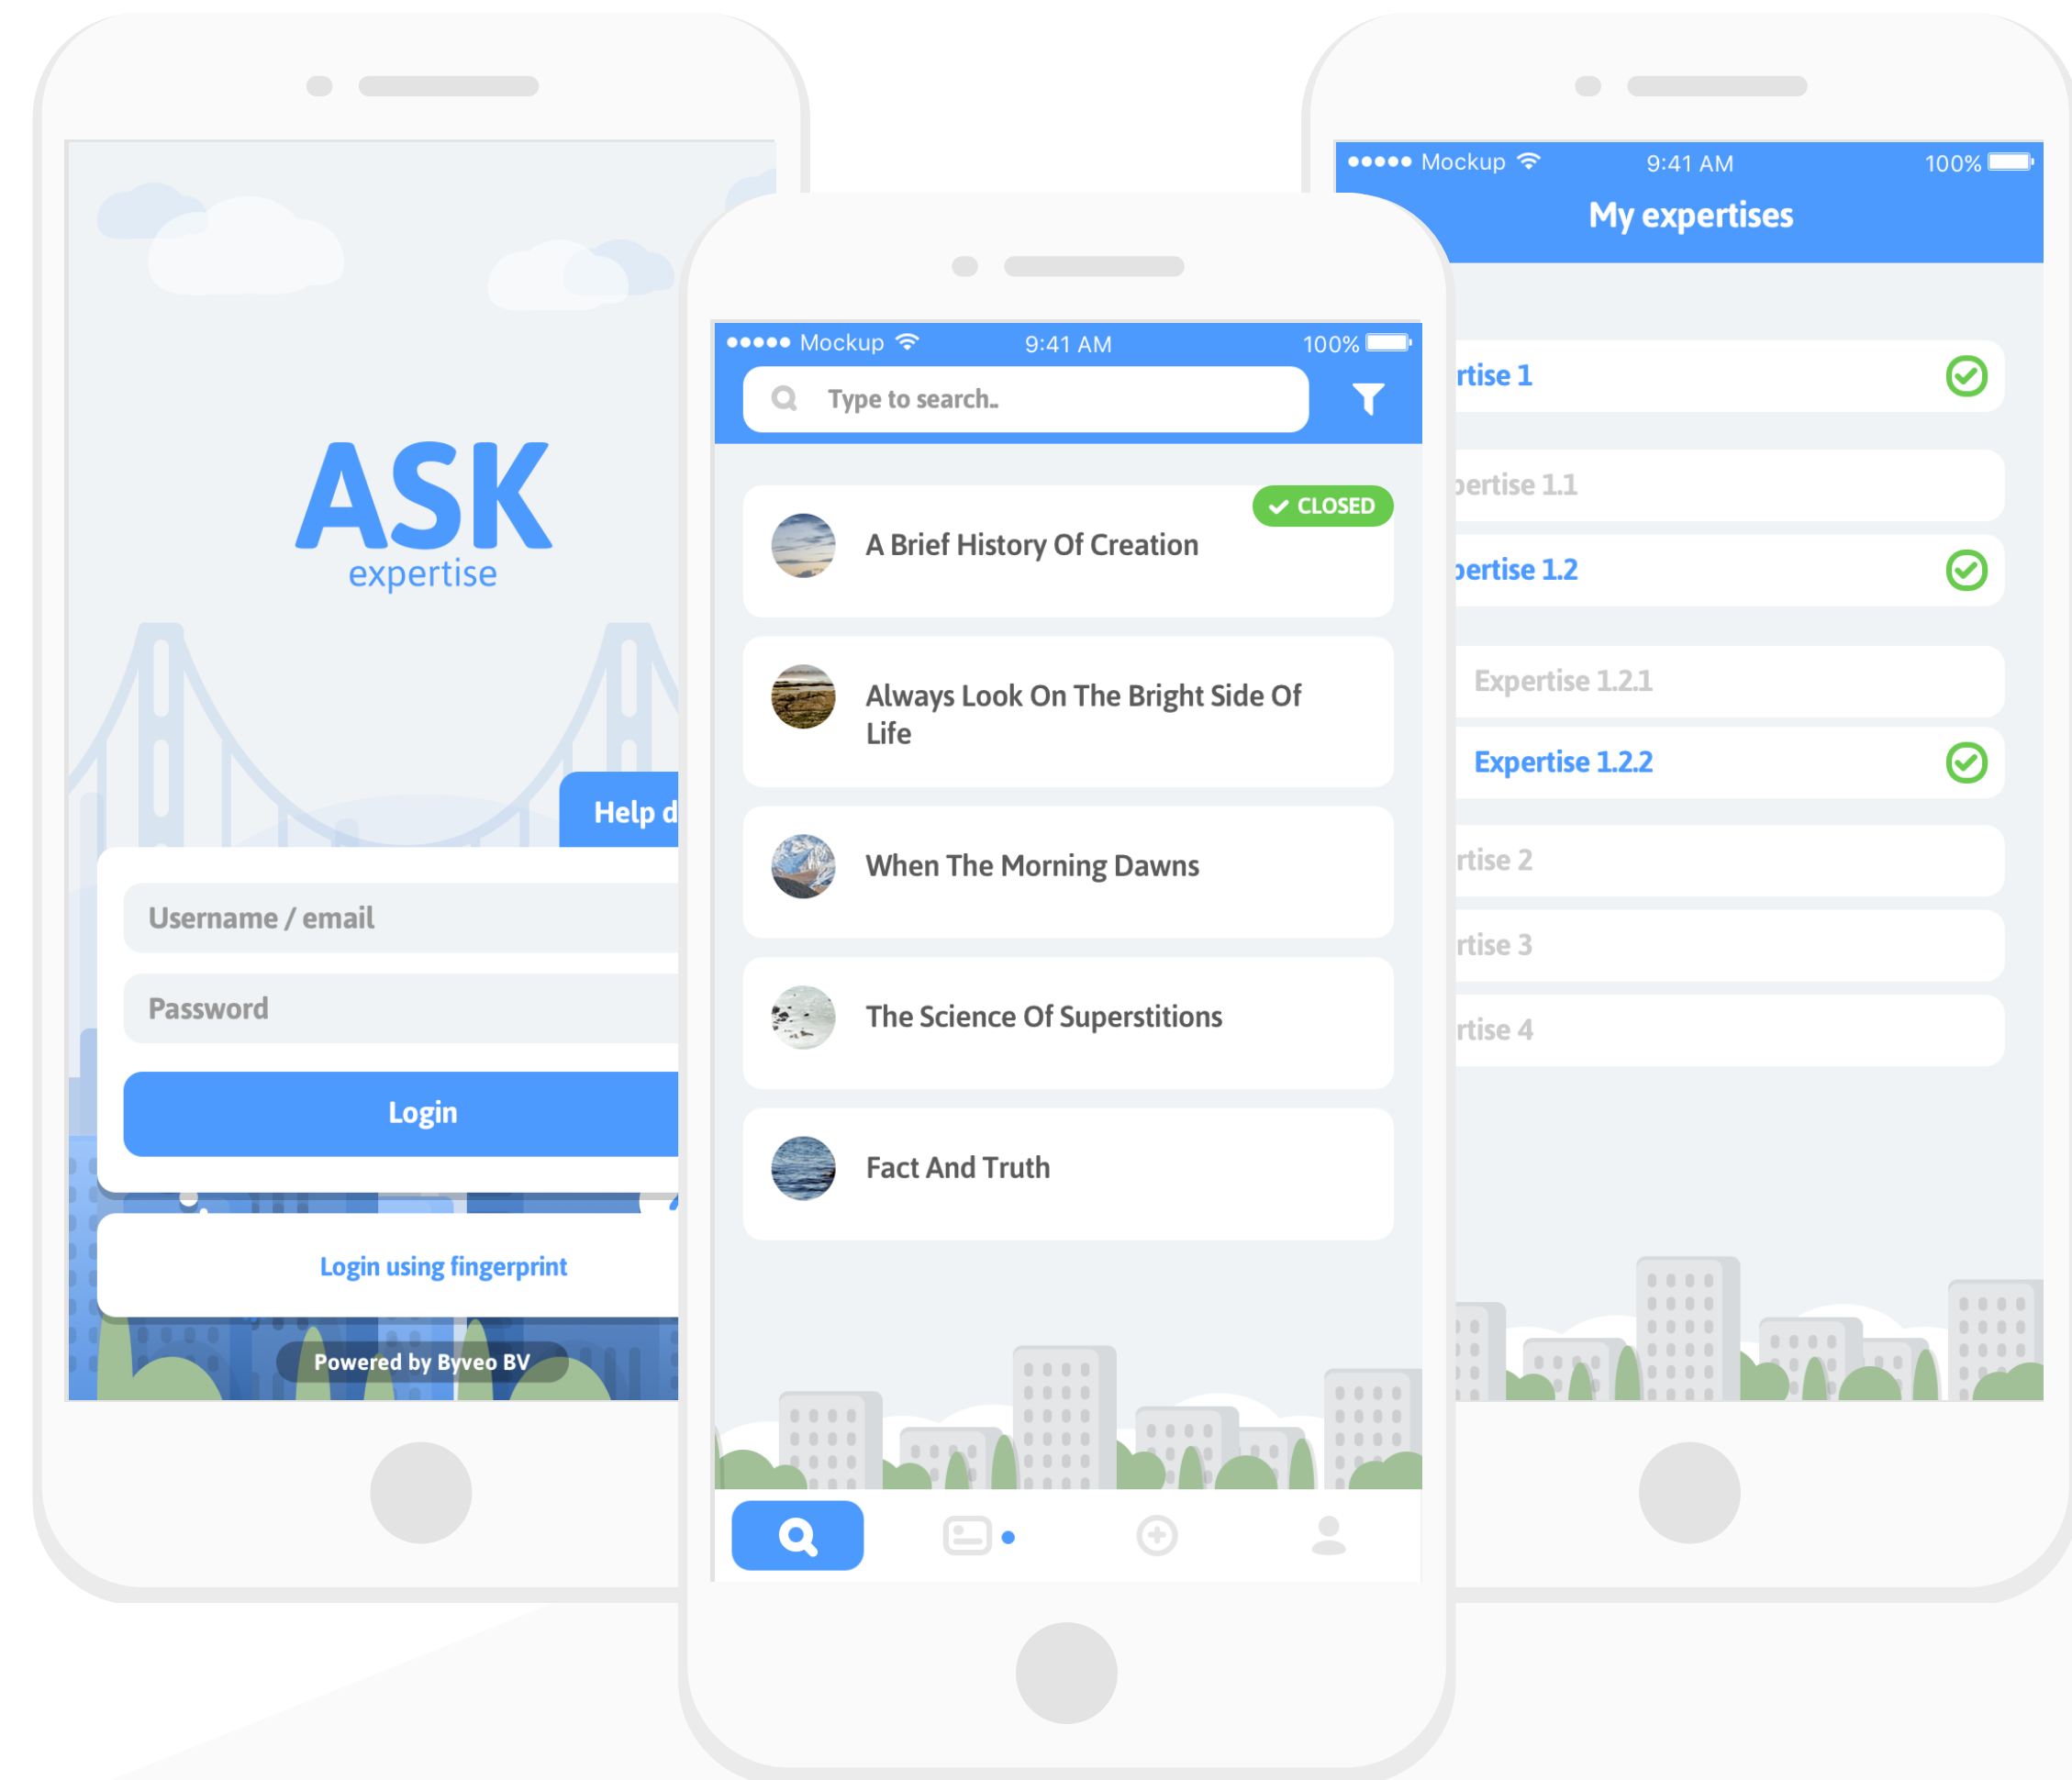

ASK Expertise

Team communication system for fast problem solving

The Expertise APP provides cross-border team communication and collaboration in one platform, making questions or solving problems faster and better specifically in this case of the healthcare sector.

Bring your question or case directly to the right people and start the right conversation to find the best solution.

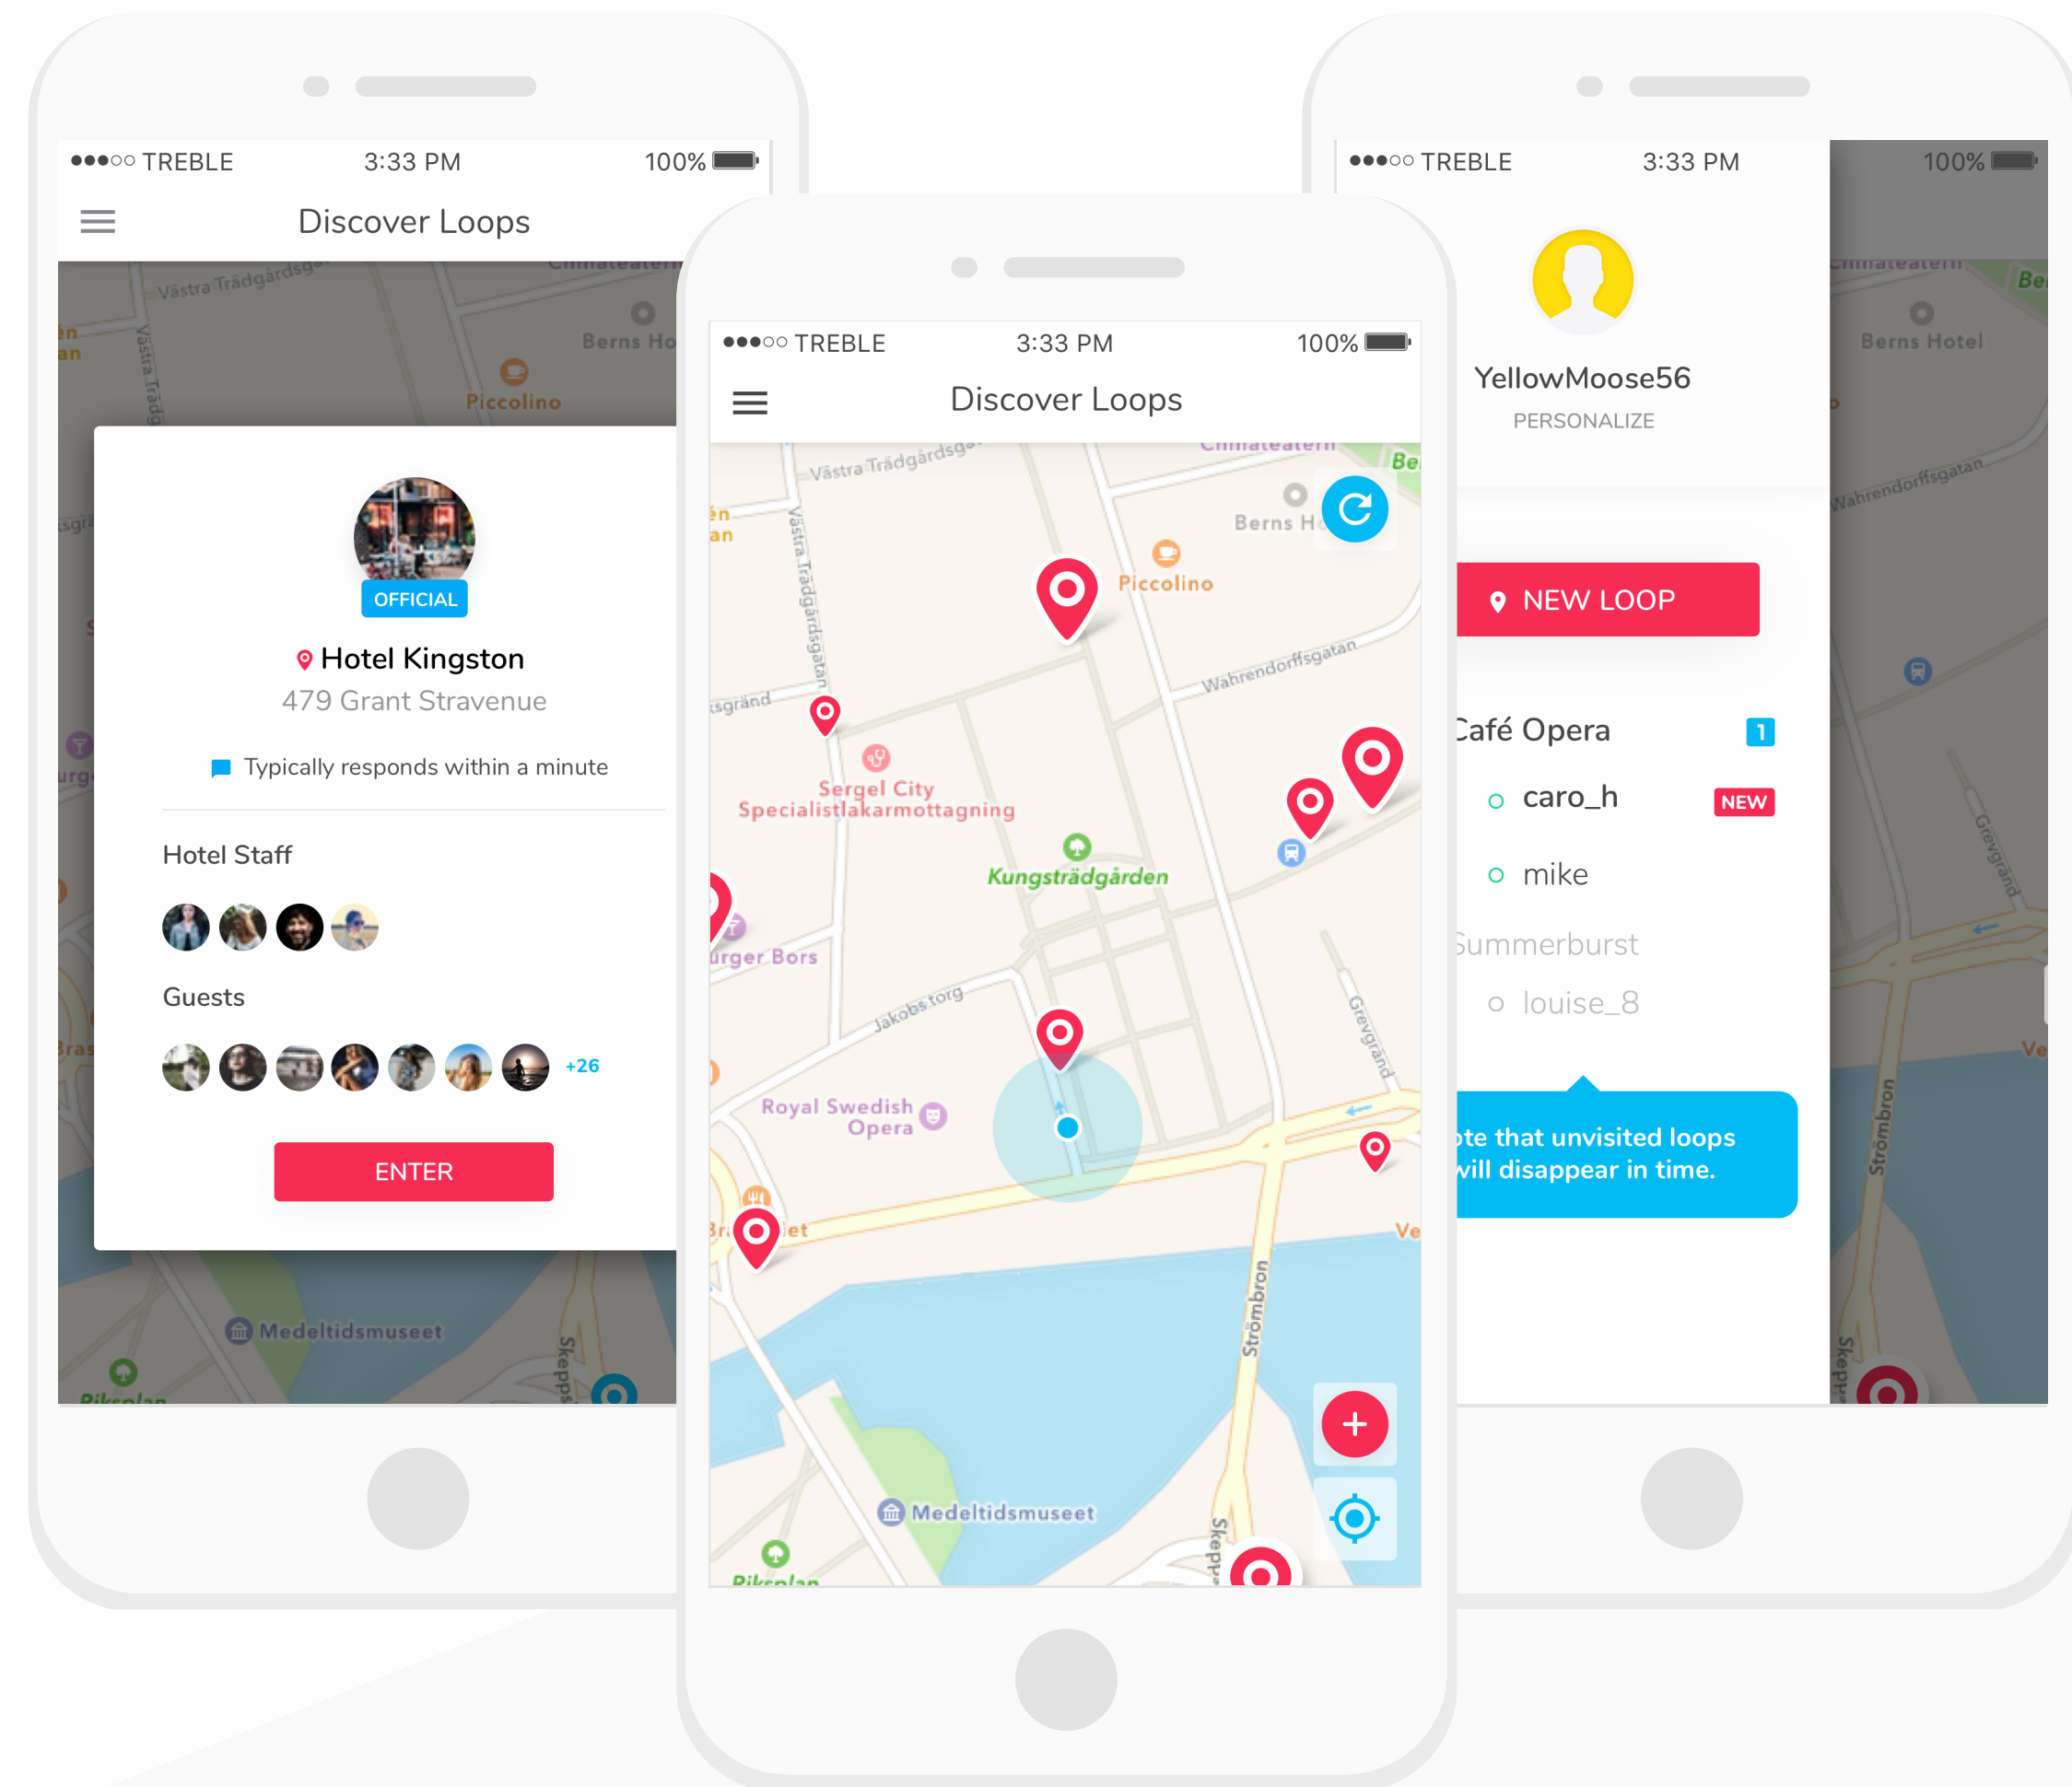

Looper

Connect with people around you

Looper is an social app based on geolocation. It's main idea is to visit the place, create or open existing loop and start chatting with people within it's radius - in order to meet or make friends.

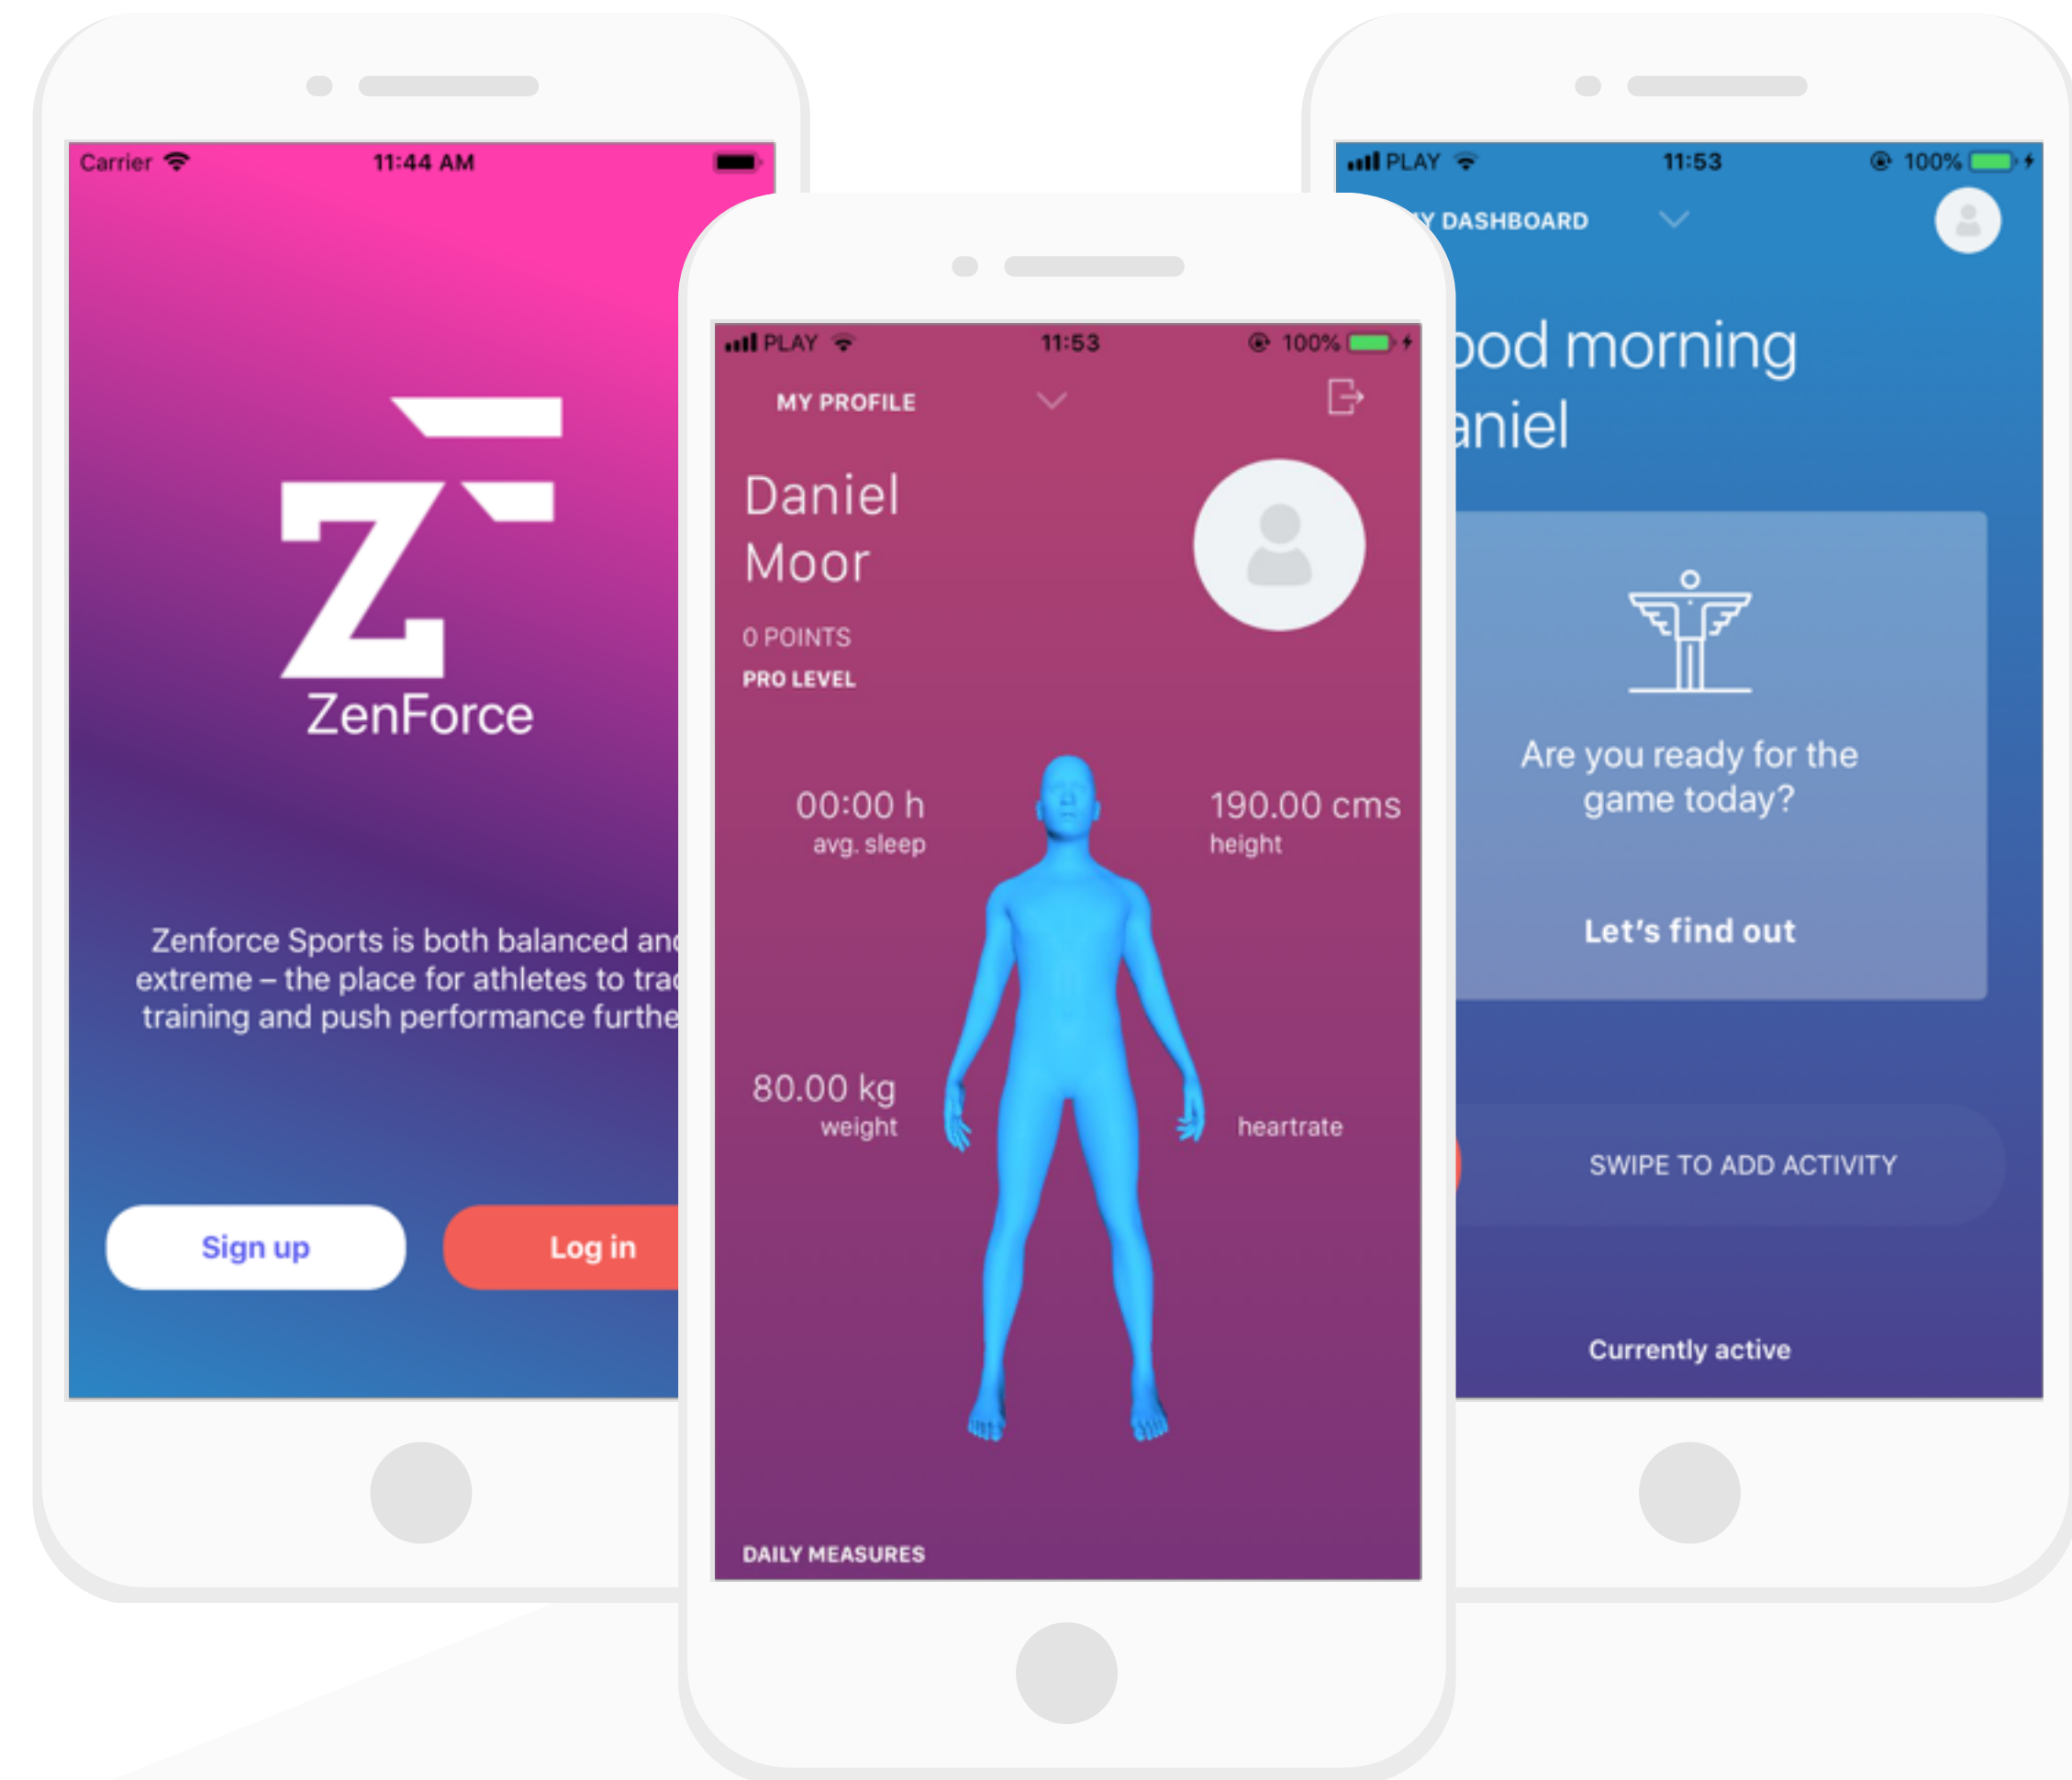

Looper also has feature for hotels that allow guests to ask questions to staff members via public or private chat. In this case application is connected with special web panel allowing both sides to communicate easily.

Zen Force

Everyone needs a little help with their New Year's resolutions

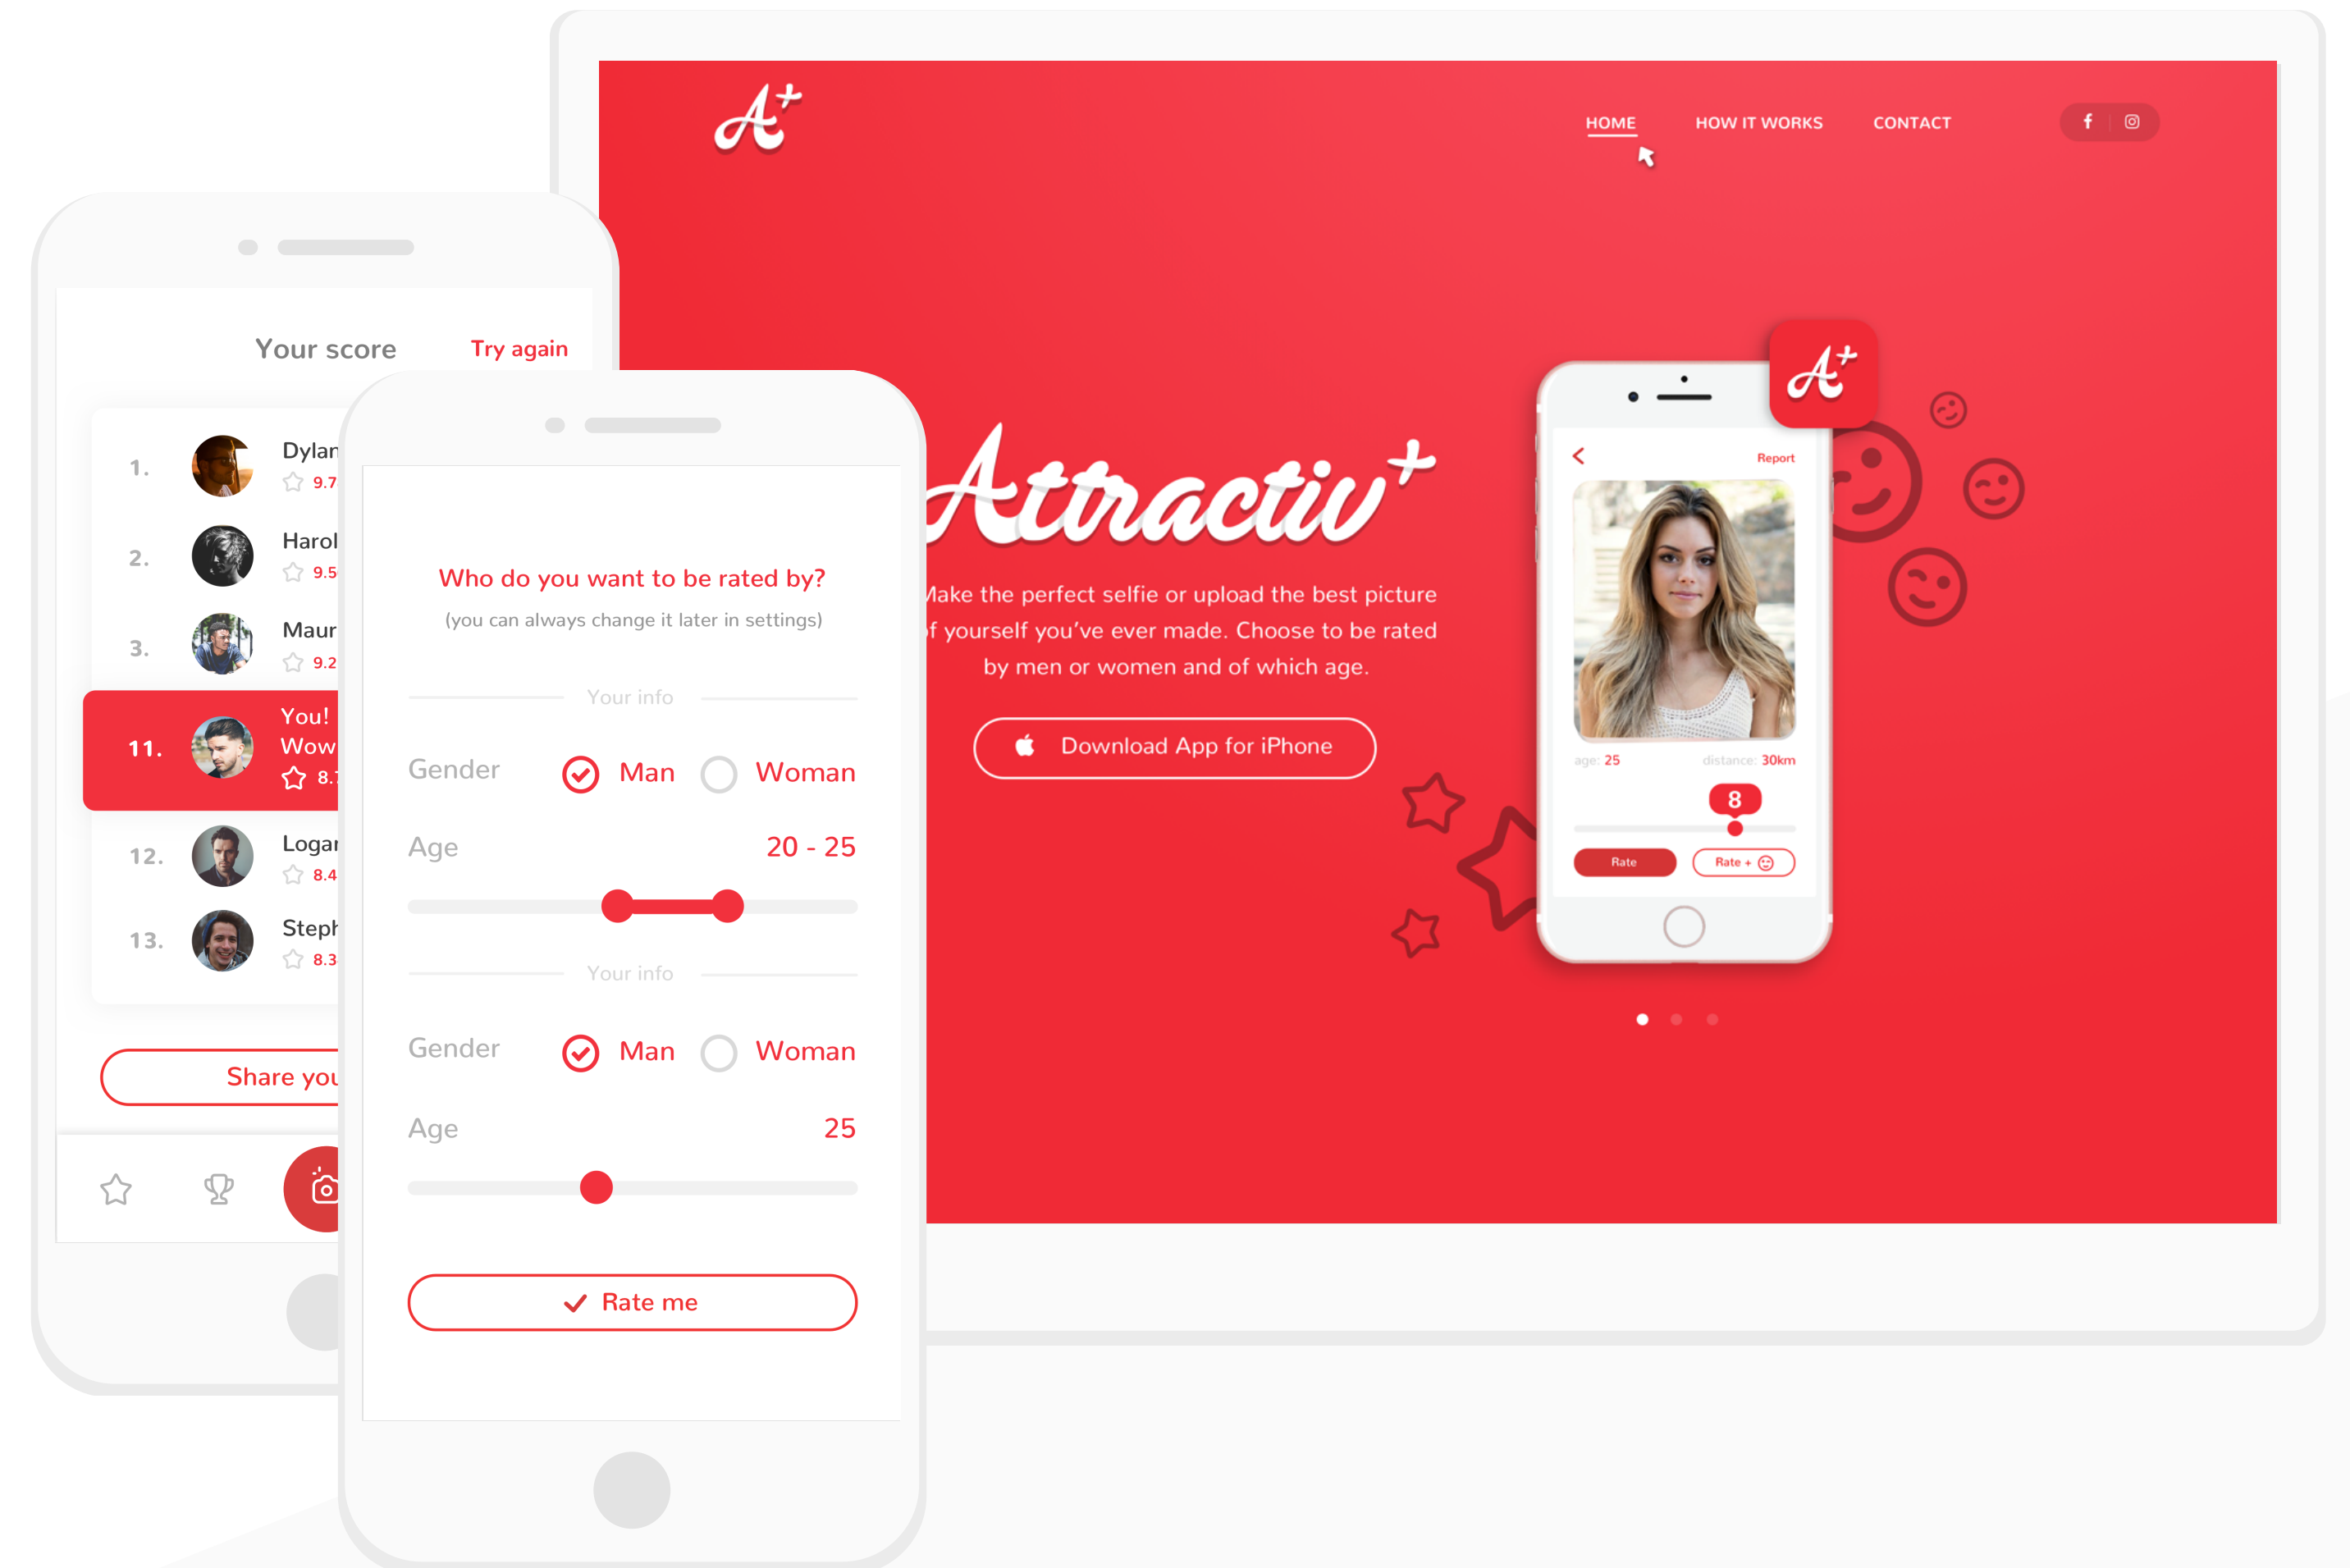

From recreational to elite athletes, from individuals to teams, from players to coaches Zenforce accommodates all. Allowing coaches, athletes and general fitness enthusiasts to manage their total togetherness of body and mind for optimal performance and wellness.

Attractiv+

Make a perfect selfie, get noticed and chat together

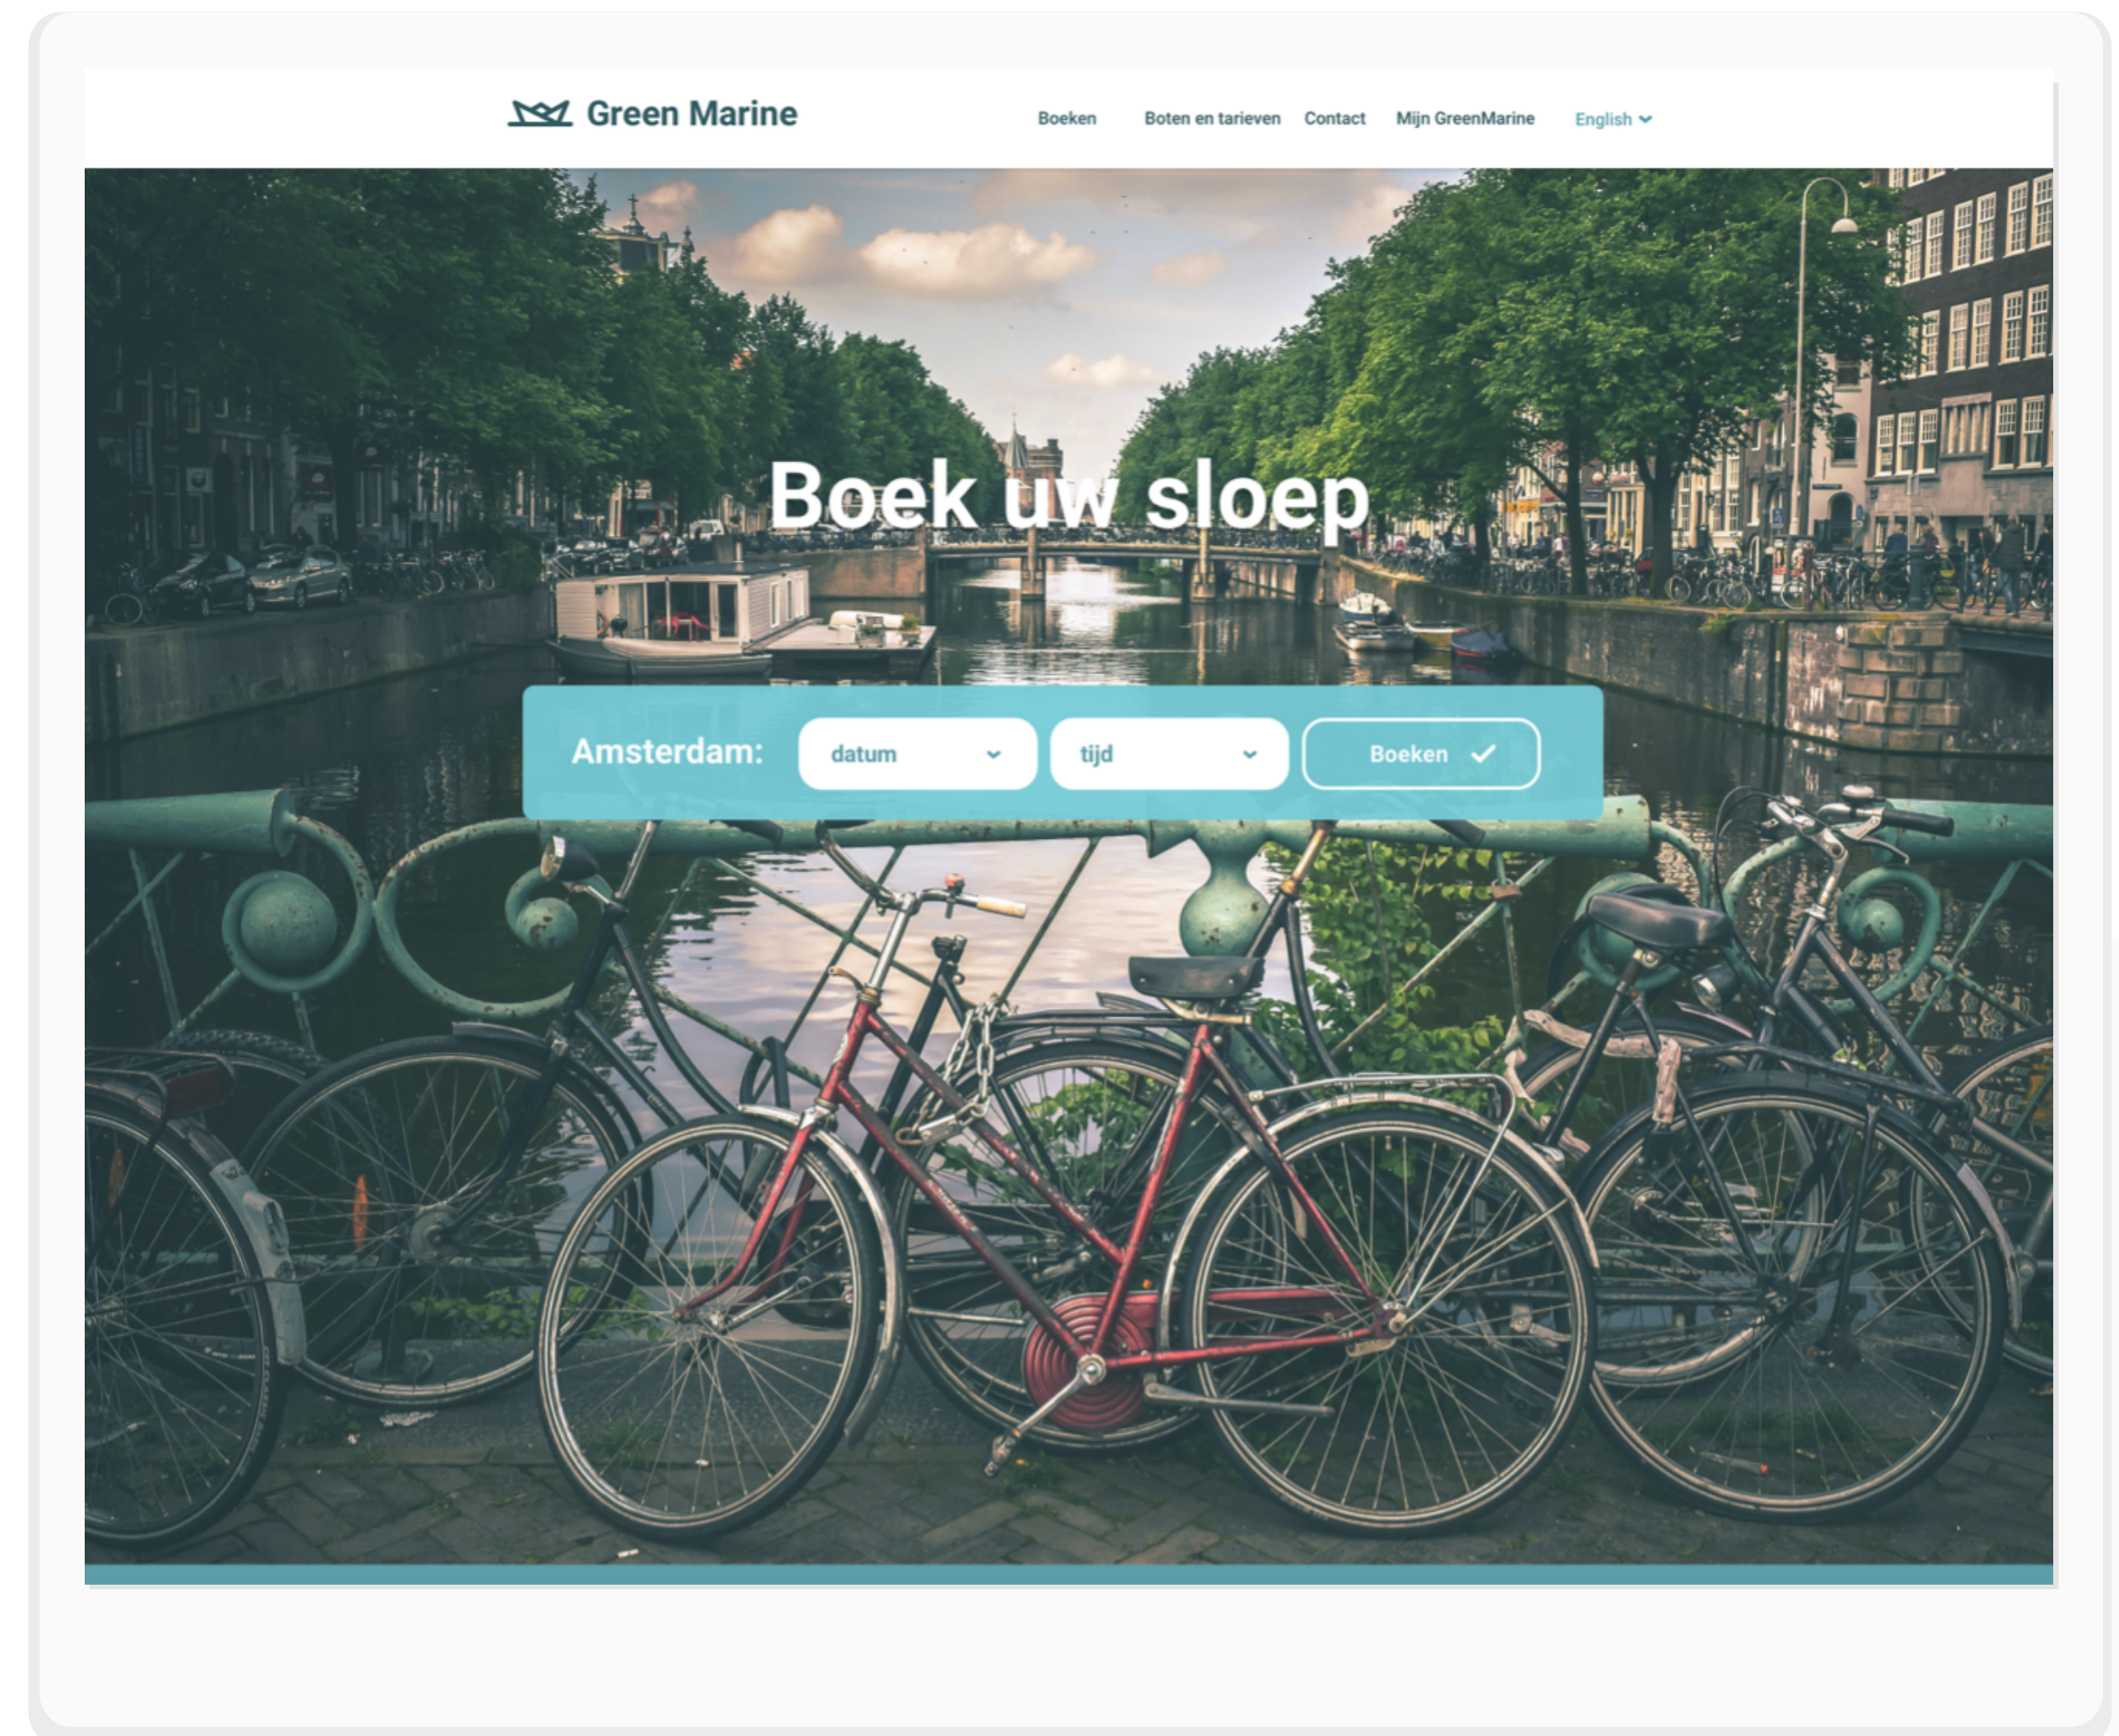

Attractiv is a social platform that gives users ability to share photos and to be rated by others. That creates global ranking which is the core of the whole project. Awesome fun and possibility to meet new attractive people around you!

Green Marine

Rent a boat, feel the wind
in your hair

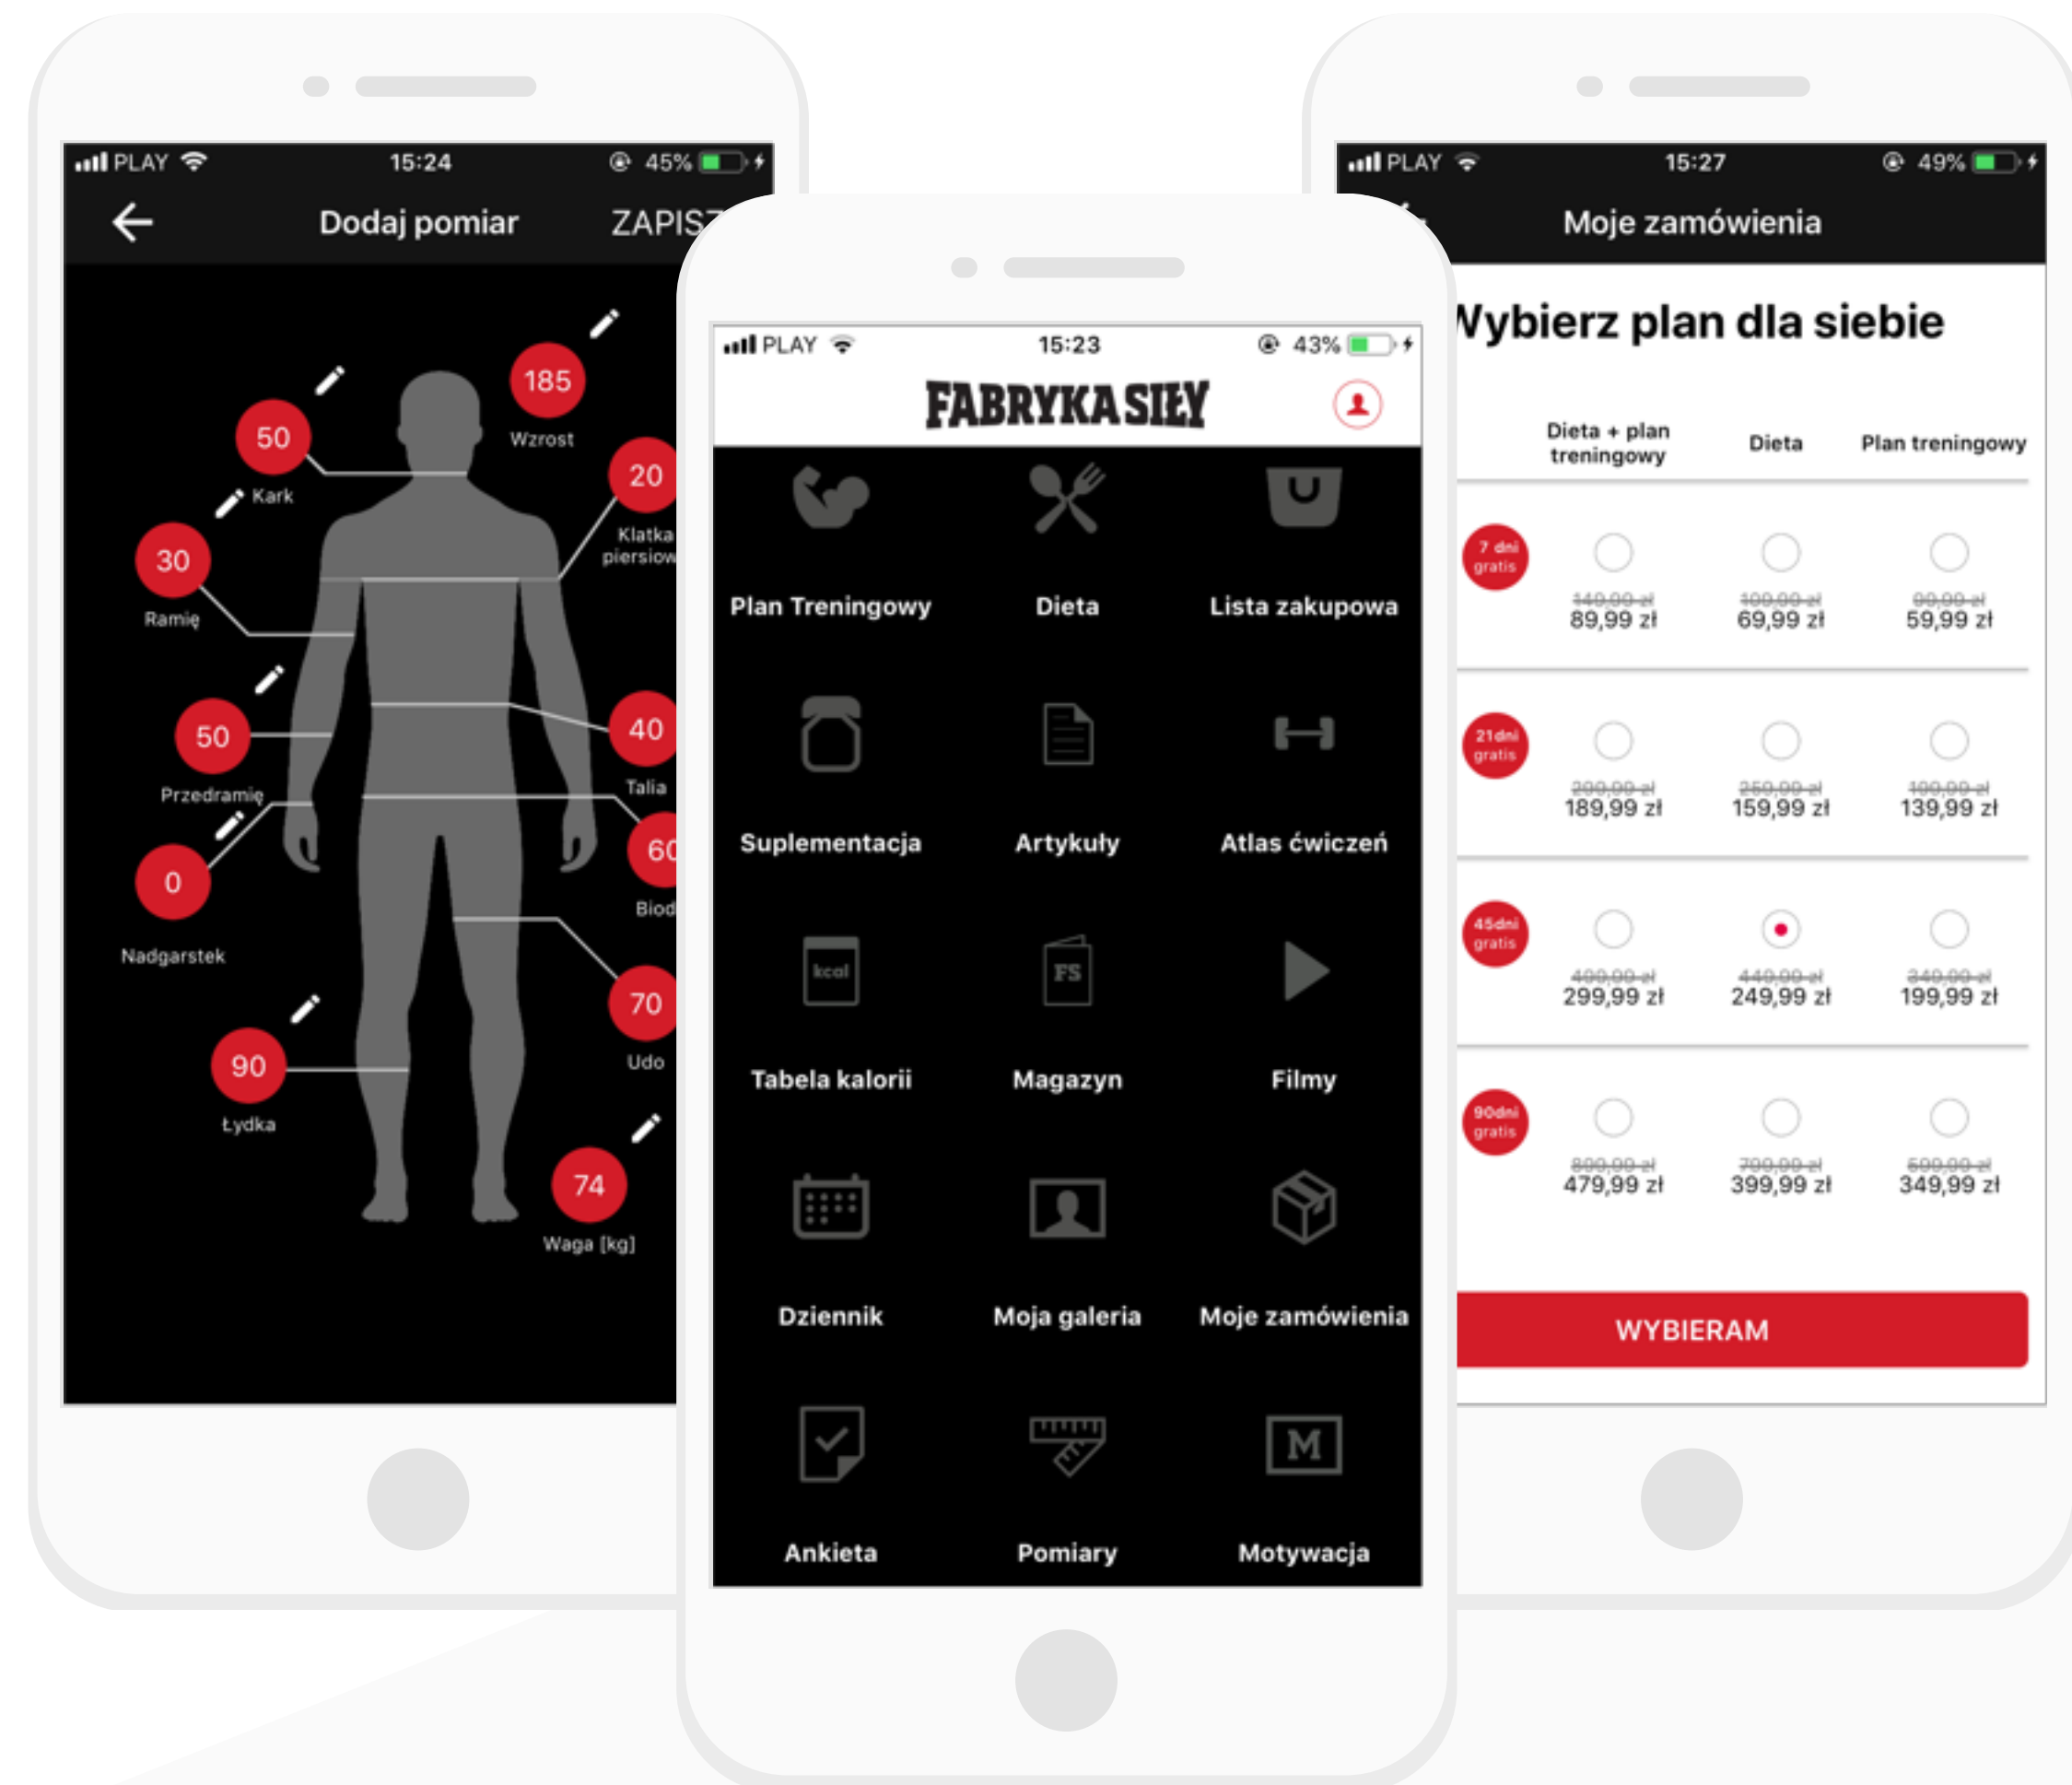

Multilingual platform made for boat renting by tourists. During this project we tackled most common UX problems that touch tickets booking systems. Our User Experience magicians completed this mission perfectly.

Fabryka Siły

Your training and diet plan,
always at your hand

Choose your goal and the package you want to use.
You will make payments and get access to your
account. You fill out the questionnaire and our
specialists prepare a comprehensive plan for you.
Start training and save your progress. Contact
trainers and pursue your goal.

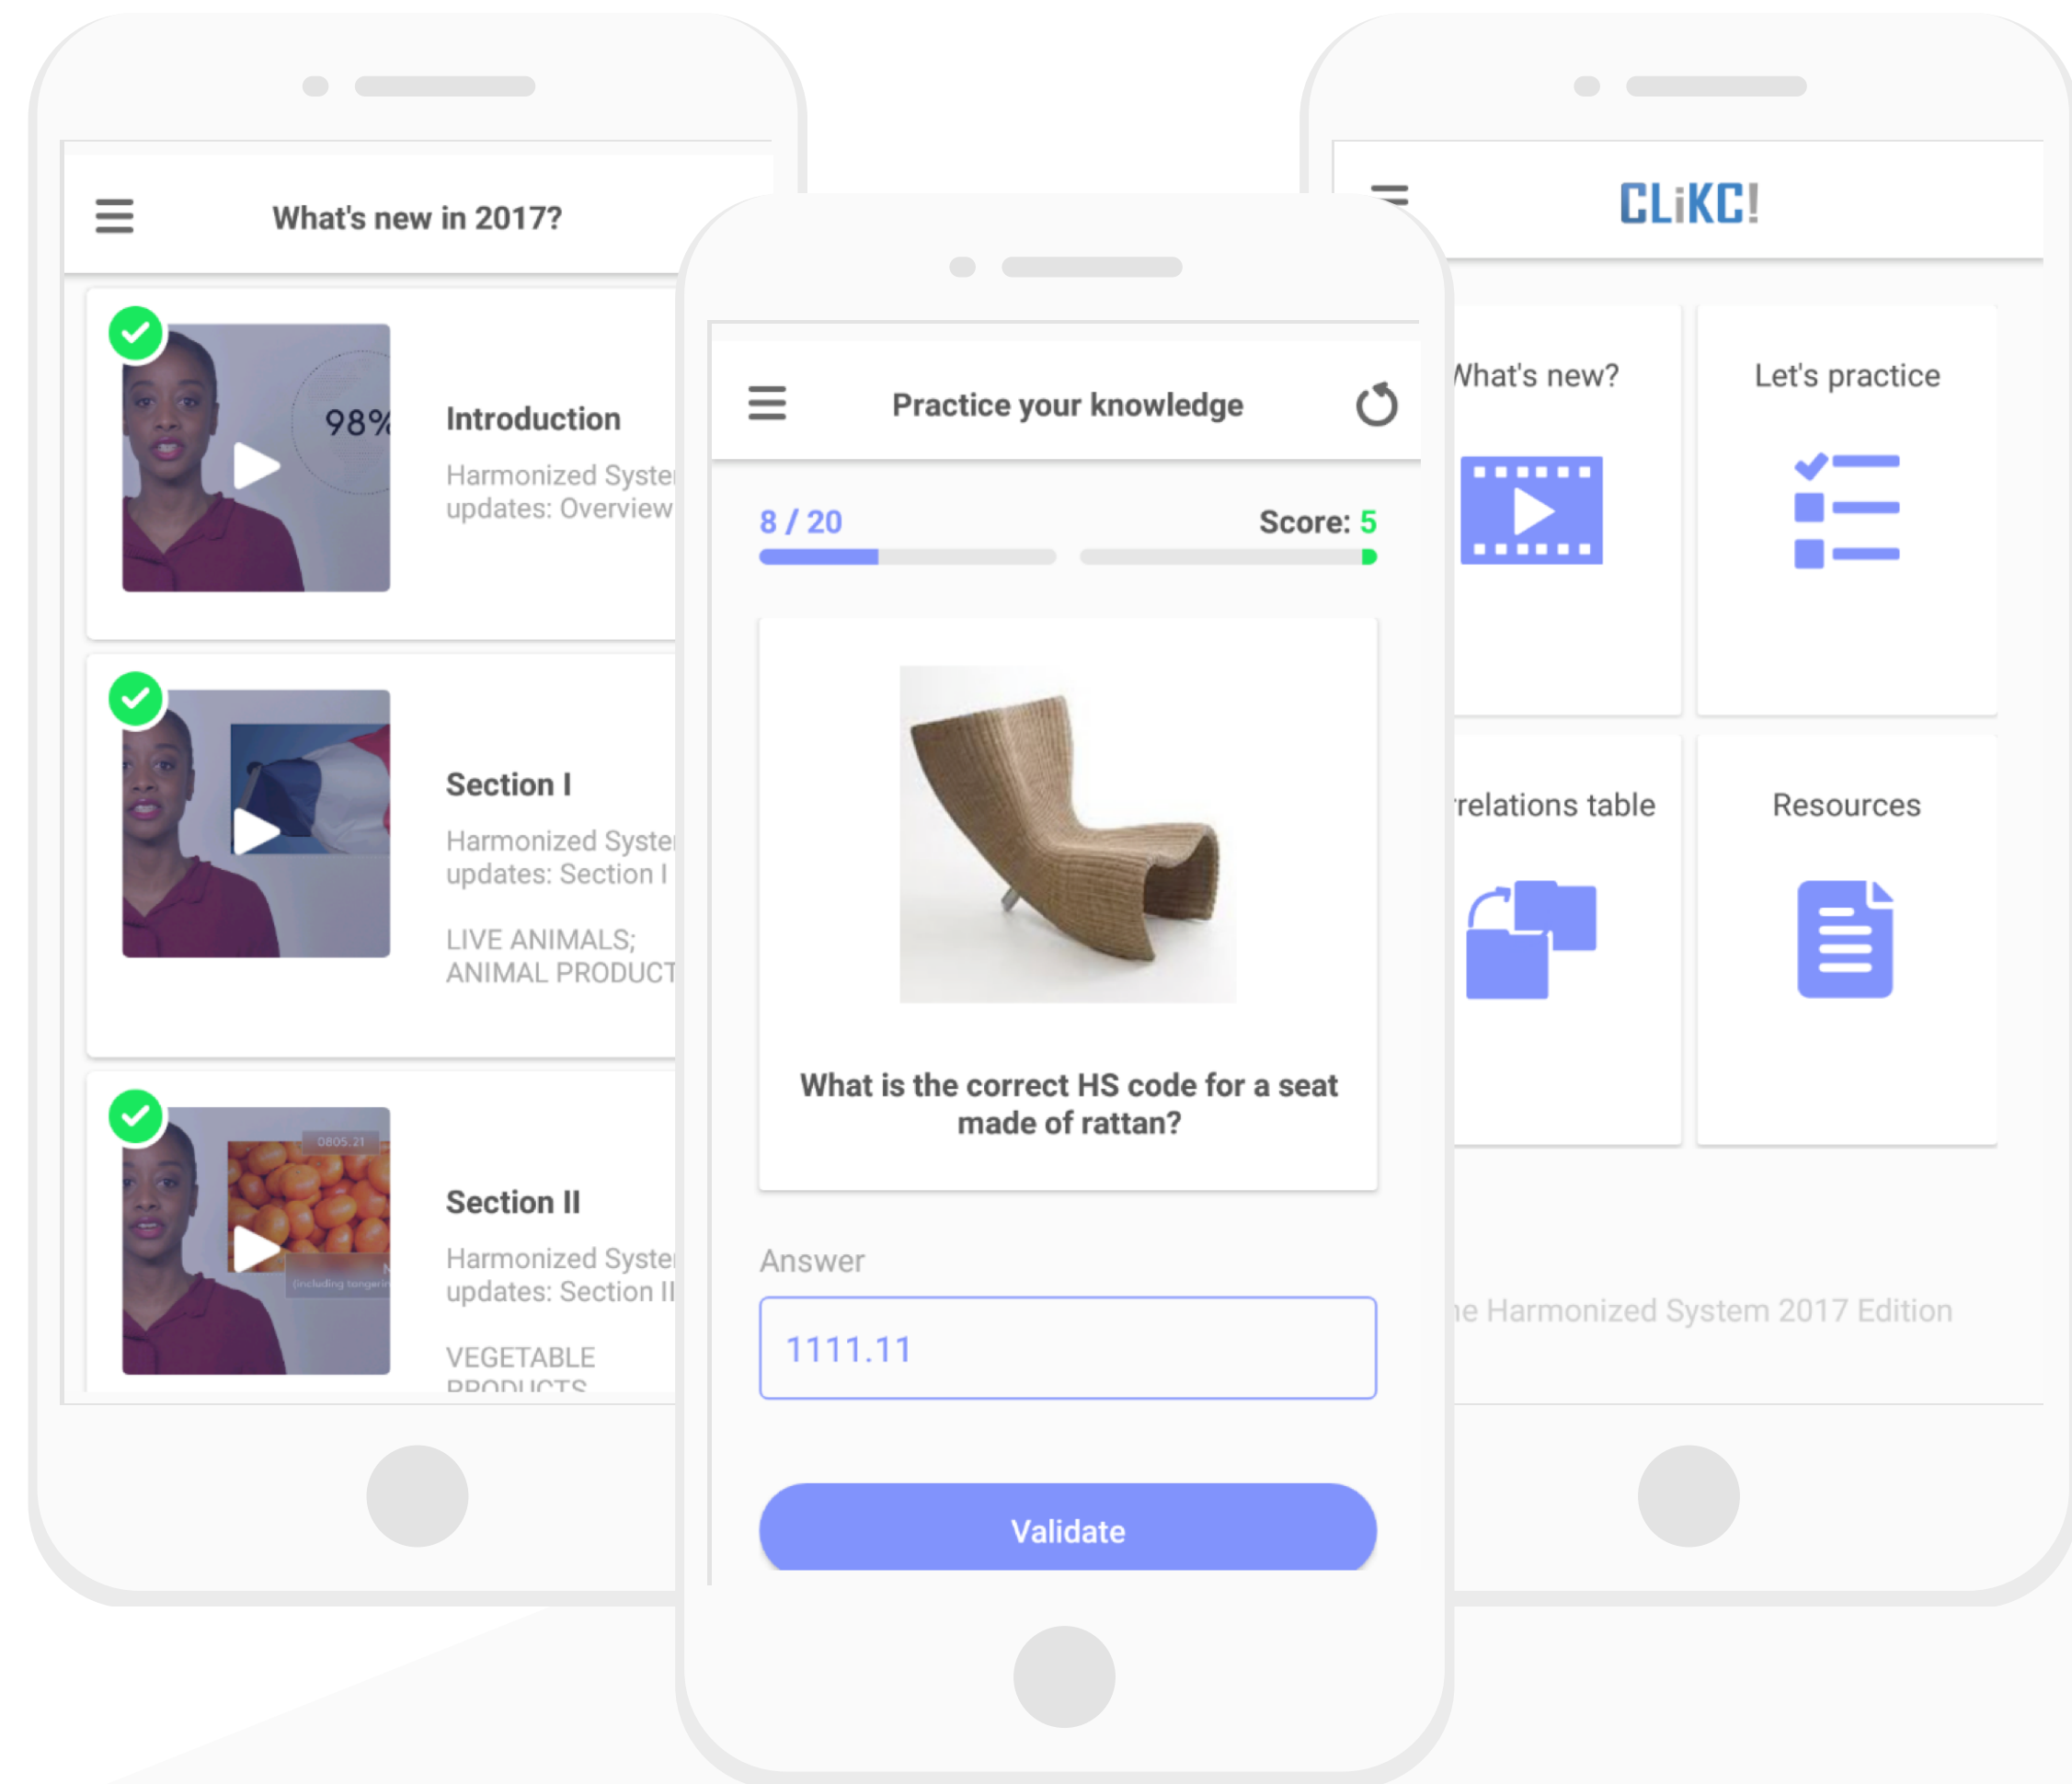

Harmonized System

Educational app for World Customs Organization

Discover the major changes that occurred to different sections of the Harmonized System in the 2017 Edition through educational videos. You will also be able to test your knowledge on the classification of goods within the Harmonized System and search for any changes between the 2012 and 2017 Editions in the correlation tables.

This app is free for everybody but provides enhanced features to Customs officers of WCO Member Administrations having an account on the WCO CLiKC! website.

PregLife

Monitor baby's development throughout pregnancy

PregLife allows women to follow pregnancy week by week with its detailed statistics and graphs. The app has its own Play channel with relaxation exercises and other footage.

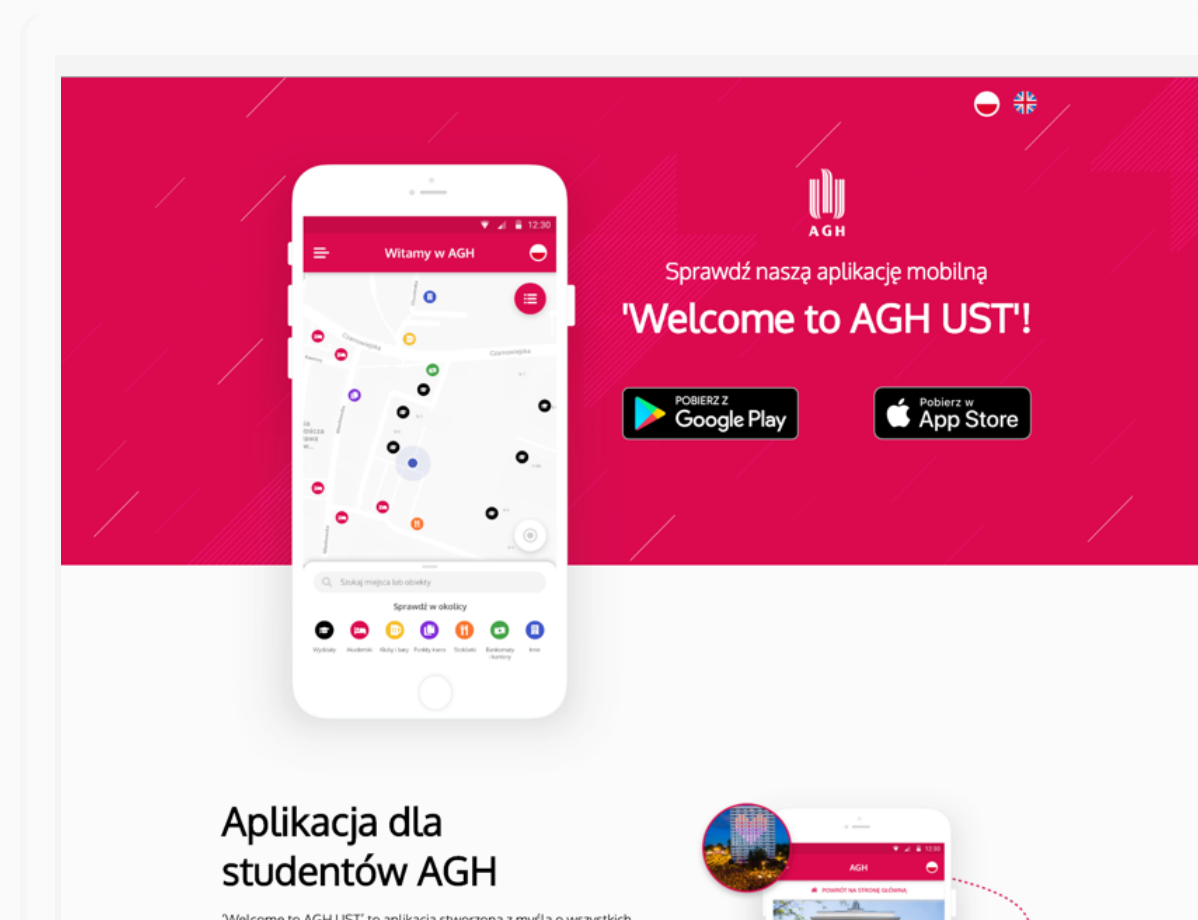

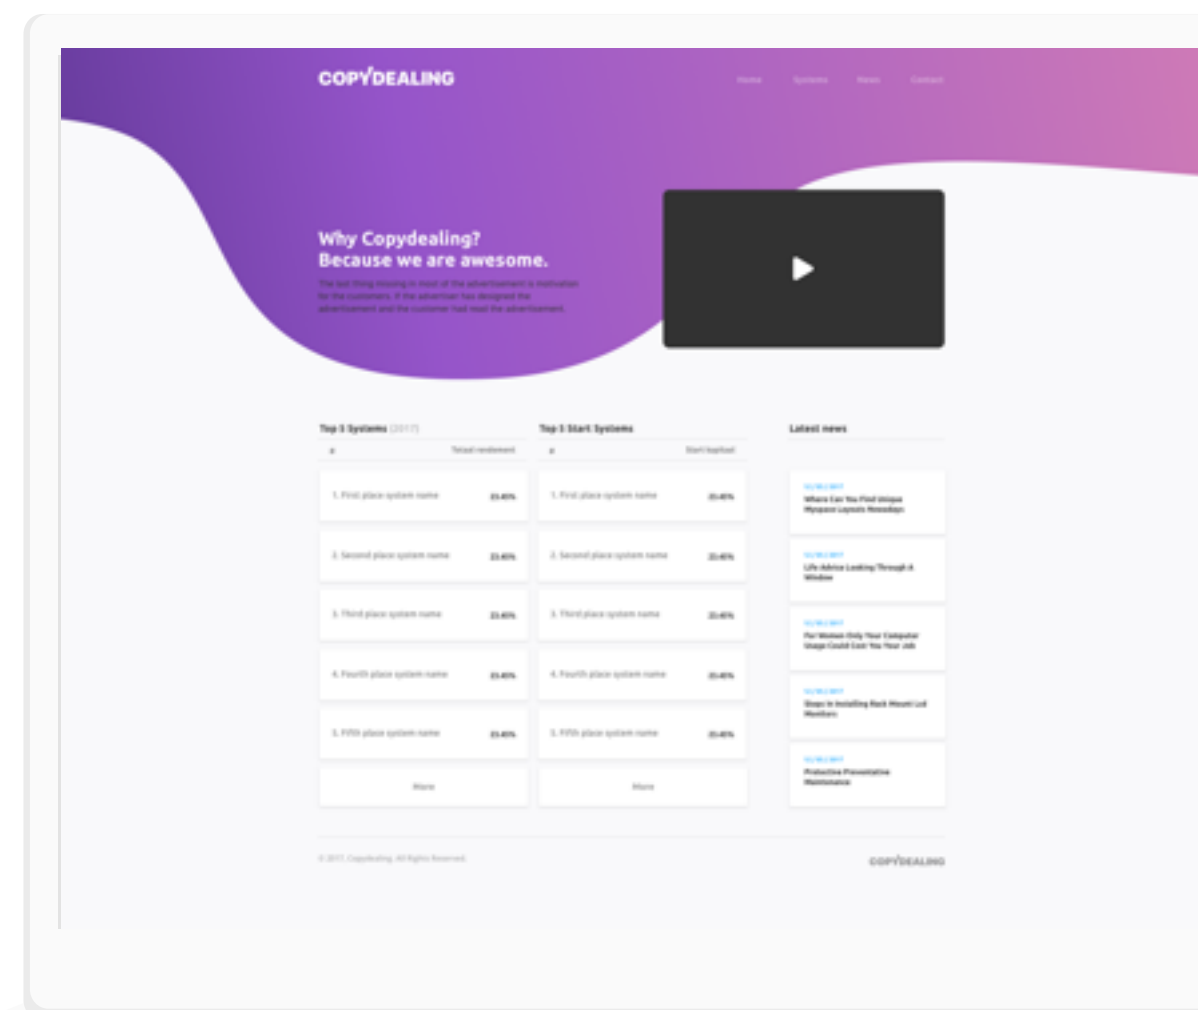

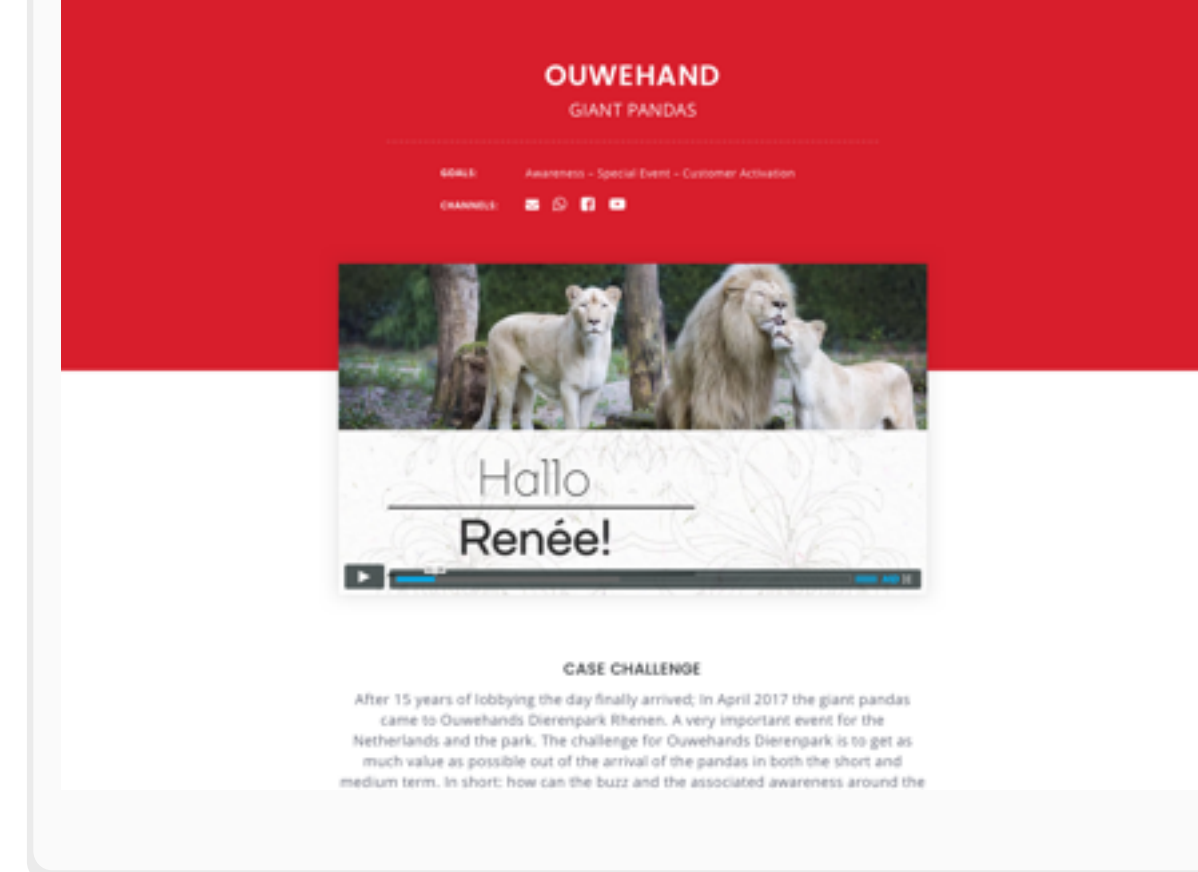

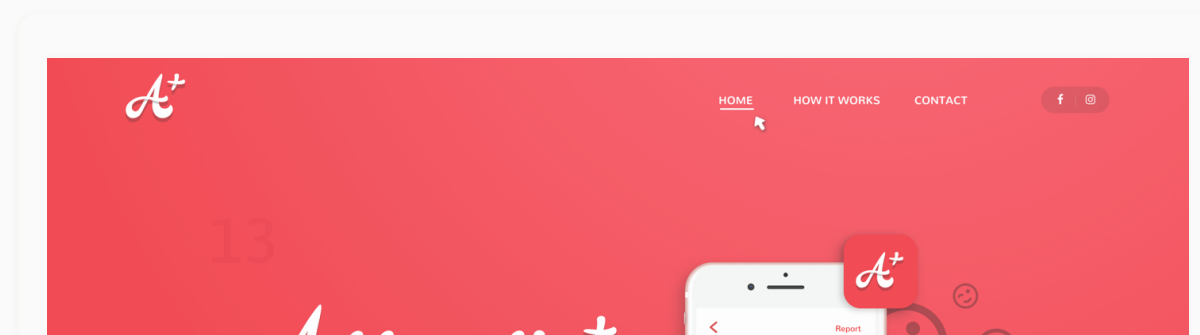

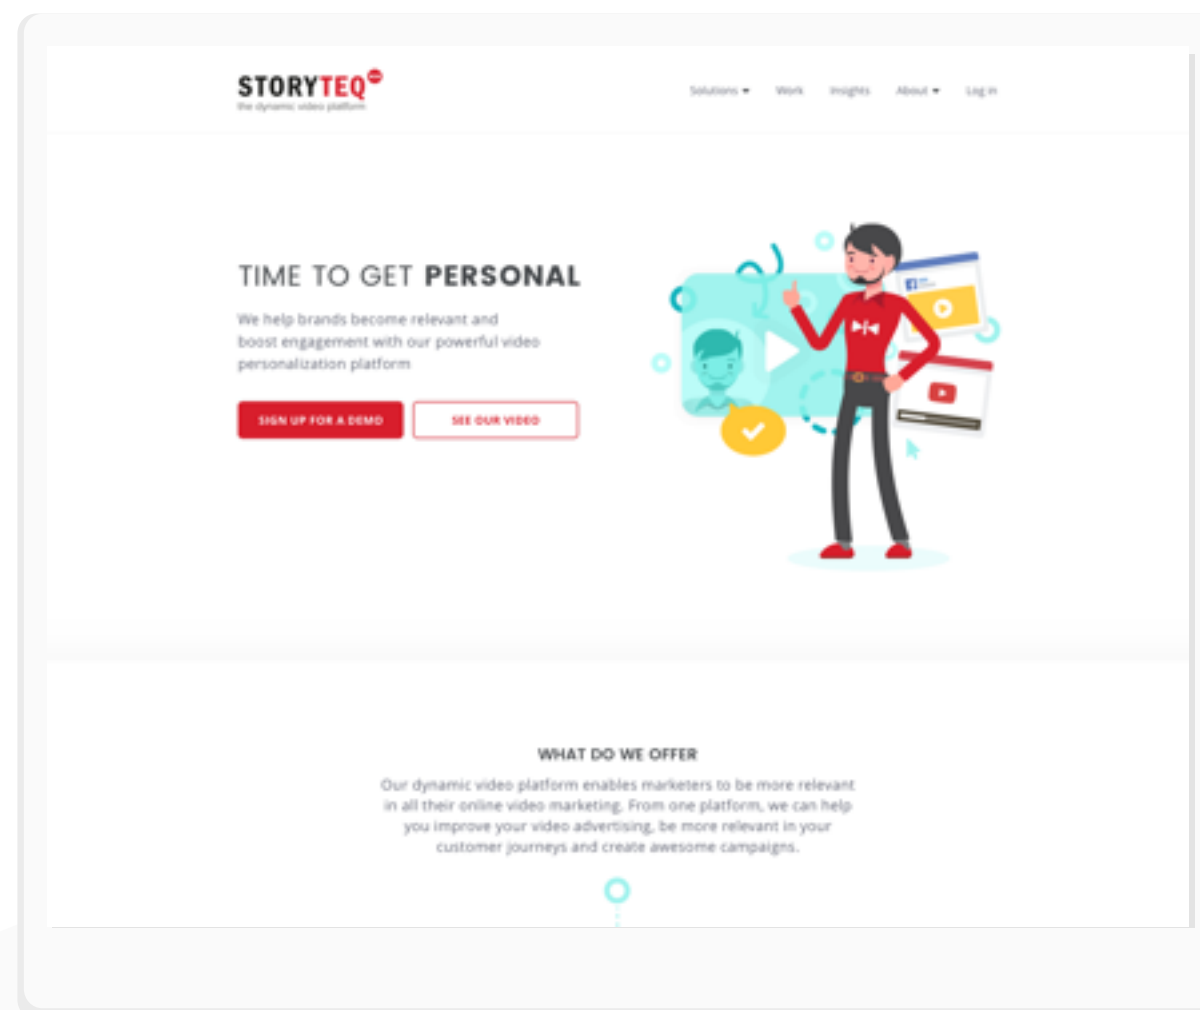

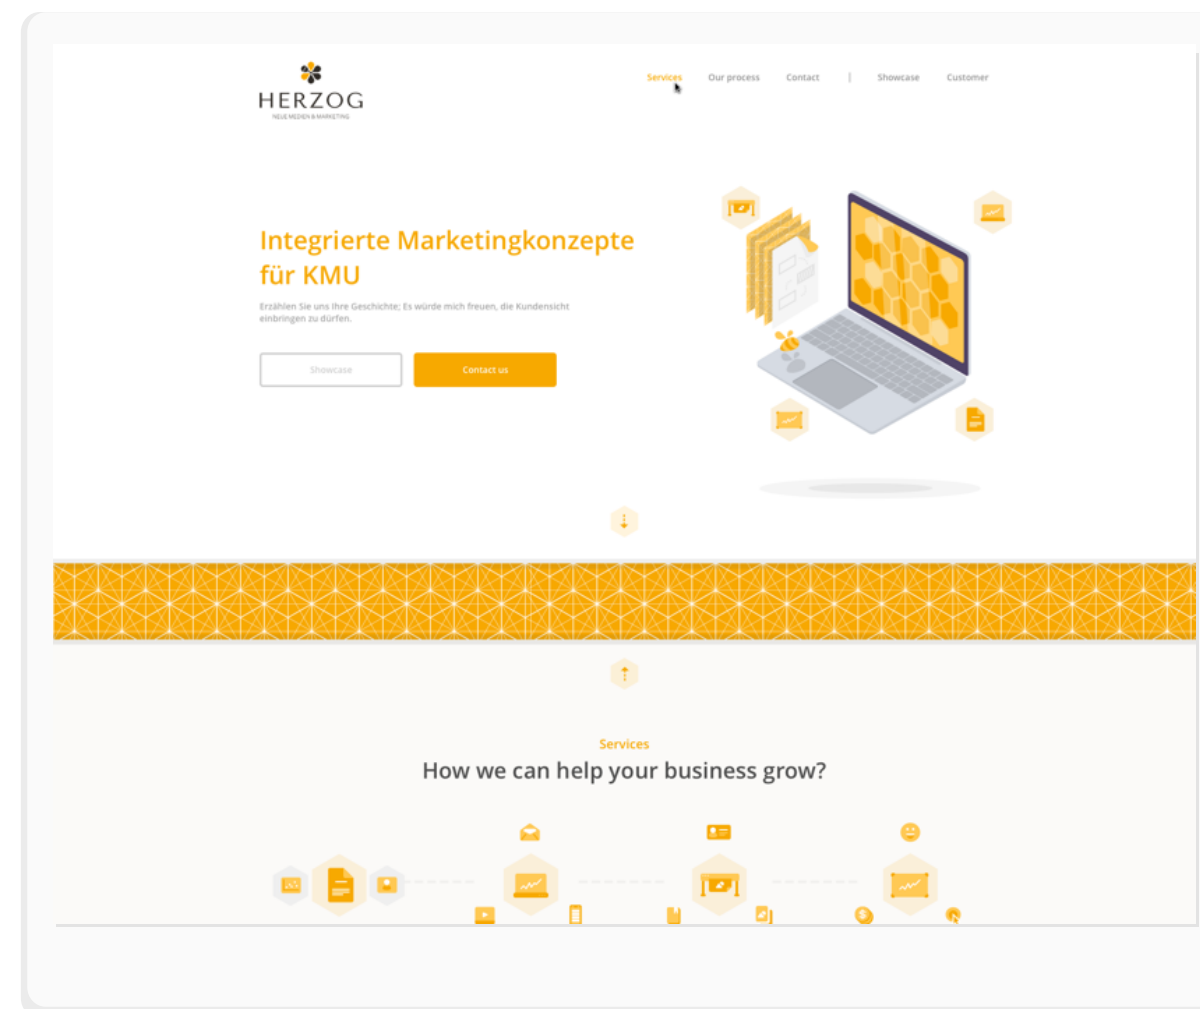

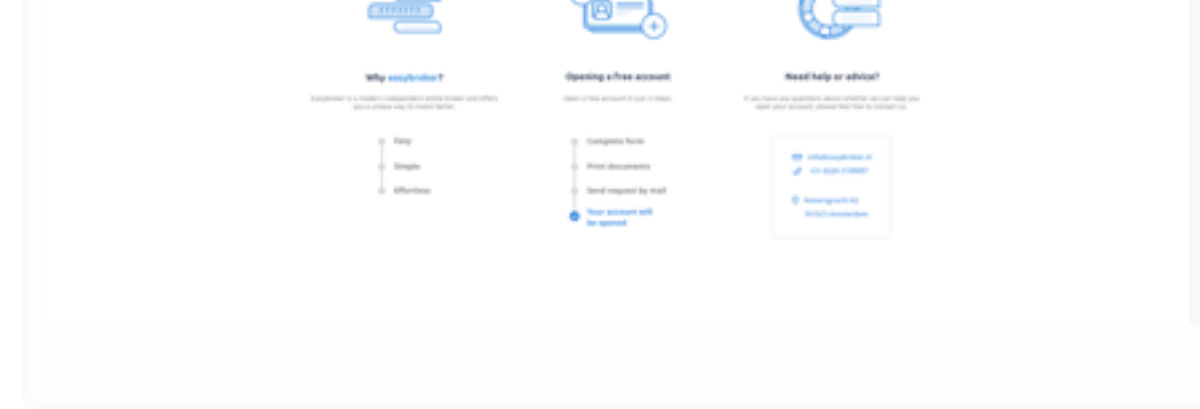

PregLife used by about 90% of all pregnant women in Sweden, and approximately 75% in Norway. Altogether, PregLife of about 65% of all pregnant women in the Nordic countries.

Web Design

Out of this world

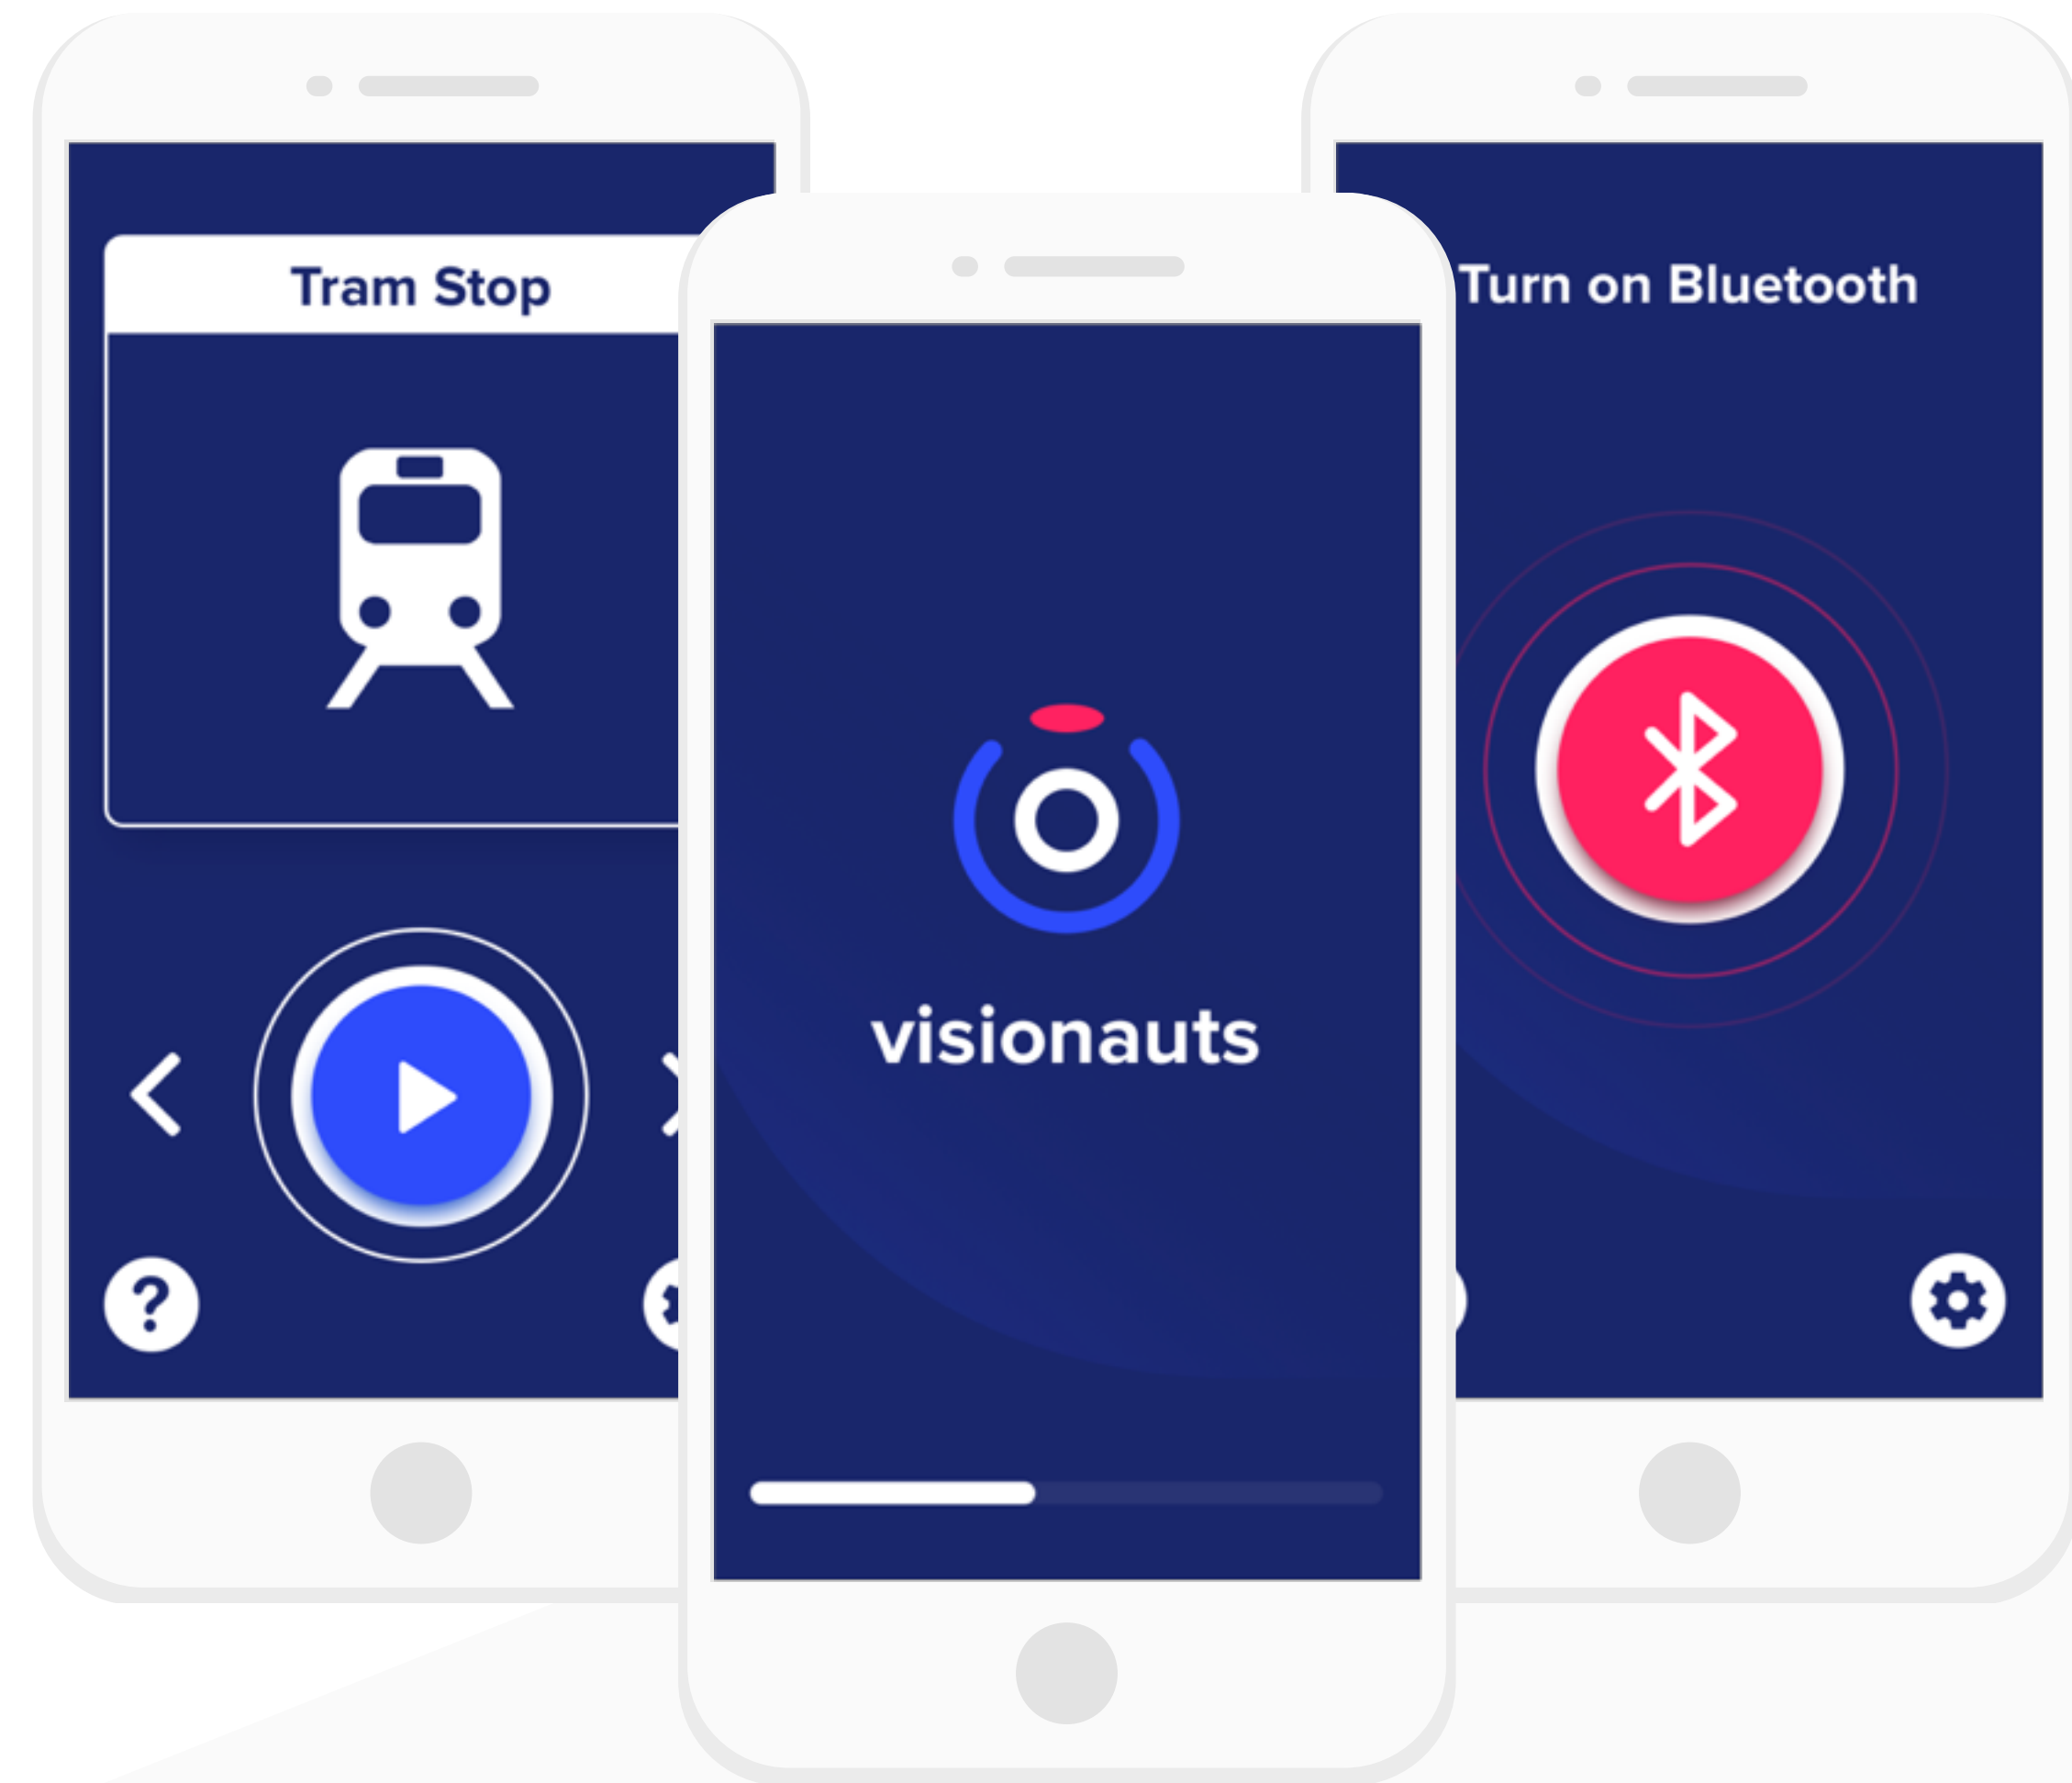

Innovation and flexibility allow us to implement the best solution to fit your needs. Our beautifully designed and user friendly website will boost your business and help you reach the stars!

Open source project

For people with vision impairment

The app locates beacons received from the backend and notifies the end user that they have approached a given location - it shows an icon representing the location and reads the location name (using Talk back, VoiceOver).

Looper

TRADEROUTER

★★★★★ Testimonial

The project management was excellent, the coding skills from the developers were of a very high standard and the whole team was totally reliable and fast when it came to support.

Richard Fox, Owner/Creative Director

Sonicbullet

After years of planning, we trusted the team at Softnauts with the development of a large scale, multiple platform project that was not only complex, but in many ways pioneering, as there was nothing like what we wanted out there.

The scale of the overall job was huge, requiring iOS, Android and web based applications to integrate with a user database. We weren't even sure if our grand plan could become reality, but they actually made it happen.
